USER GUIDE · OCTOBER 2026

ECCE Tool

The Complete Step-by-Step Guide

Everything you need to sign in, find the right tool and get things done — explained in plain, friendly language, with a picture of every screen.

Parents | Schools | Admins | Super Admins

Welcome!

ECCE Tool is a website full of ready-to-use material for preschools and parents: yearly plans, worksheets, games, assessments, teacher training, school forms and marketing helpers. This guide walks you through every screen, one small step at a time. **You do not need any computer knowledge** — if you can use WhatsApp, you can use this. All pictures show made-up names and sample data, so no real customer details appear anywhere.

Who is this guide for?

Parent

A parent at home who has subscribed. Uses the **Parent** tile.

Read: **Part 1** and **Part 2**

School

A preschool: owner, principal or teacher. Uses the **School** tile.

Read: **Part 1** and **Part 2**

Admin

A team member who sets up customer accounts — only their own.

Read: **Part 1.1** and **Part 3**

Super Admin

The owner account. Creates Admins and manages everyone.

Read: **Part 1.1** and **Part 4**

What each role can do

What you want to do	Parent	School	Admin	Super Admin
Use the nine learning areas (curriculum, worksheets, games...)	✓	✓	✗	✗
See how many subscription days are left	✓	✓	✗	✗
Create customer accounts (Parent or School)	✗	✗	**Own only**	✓
See the list of customers	✗	✗	**Own only**	**All**
Renew, edit or delete a customer	✗	✗	**Own only**	✓
Create, edit or delete Admins	✗	✗	✗	✓

Good to know. Parent and School accounts see **exactly the same nine learning areas**. The only differences are the sign-in tile and the greeting on the Home page. Admin and Super Admin accounts are for managing accounts — they do not open the learning areas.

How to read this guide

- **Orange numbered circles** 1 on a picture match the numbered steps beside it. Do the steps in order and you can't go wrong.
- **Green button names** such as Sign In are written exactly as they appear on the screen.
- Coloured boxes give extra help: **Tip** (a shortcut), **Good to know** (background) and **Please note** (be careful).

5.4 Contact us 46

PART 1

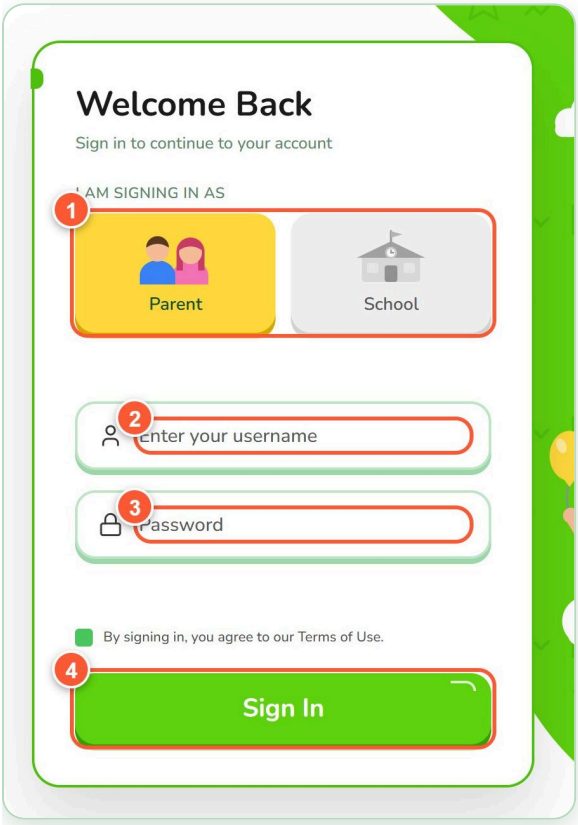

Getting started

Signing in, finding your way around, and understanding your subscription. These pages are for everyone, whichever role you have.

For: everyone

1.1 Opening the website and signing in

Every person — parent, school, admin or super admin — starts on the same **Sign In** page.

The Sign In card. The numbers match the steps.

1. **Choose who you are.** Tap **Parent** if you are a parent at home, or **School** if you are a preschool. The tile you pick turns yellow.
2. **Type your username** (the Login ID we sent you) in the first box.
3. **Type your password** in the second box. The letters show as dots so nobody can read them over your shoulder.
4. **Press Sign In** (or press the **Enter** key). The button says *Signing In...* for a moment, and then your Dashboard opens.

Tip. Admins and Super Admins: you can leave the tile as it is. The site recognises your account and takes you straight to your management screen (see Parts 3 and 4).

Good to know. Your username and password are given to you by the ECCE Tool team (or by your Admin) after your subscription is activated. If you do not have them yet, see section 1.3.

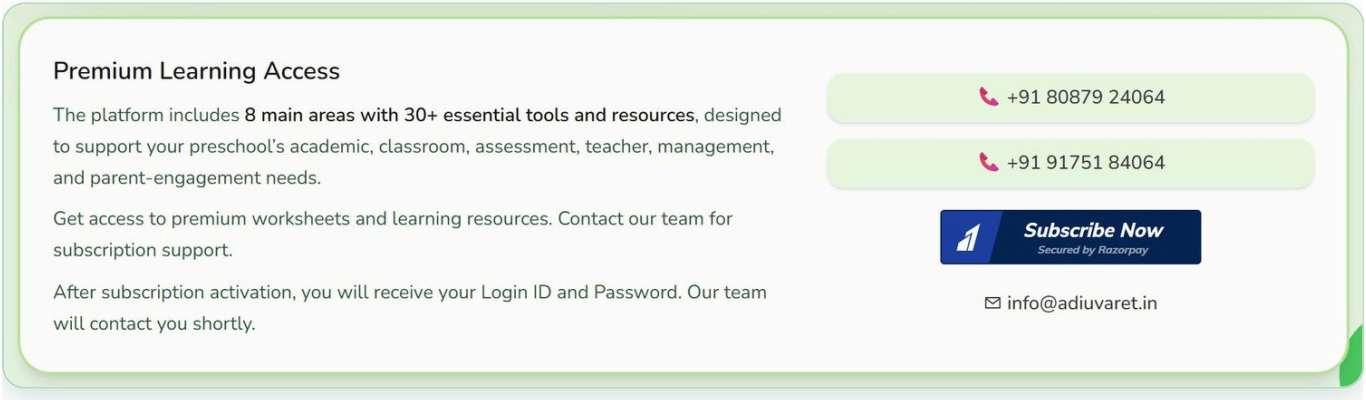

1.2 Messages you might see when signing in

Don't worry — every message tells you what to do. Here is what each one means.

Message on screen	What it means	What to do
Invalid credentials	The username or password was not recognised.	Check for typing mistakes, extra spaces and the Caps Lock key, then try again. If you have forgotten them, ask the person who gave you the login (your Admin) to set a new password (see 3.4).
This is a Parent account. Please select Parent and sign in again.	You picked the School tile, but your account is a Parent account.	Tap the **Parent** tile and press Sign In again. Nothing is lost.
This is a School account. Please select School and sign in again.	You picked the Parent tile, but your account is a School account.	Tap the **School** tile and press Sign In again.
Subscription expired	The end date of your subscription has passed.	Contact the team to renew (phone and email are on the Sign In page and in section 5.4).

1.3 No login yet? How to subscribe

Scroll down on the Sign In page. Under the sign-in card you will find the box called **Premium Learning Access**. It tells you what is included and how to get started.

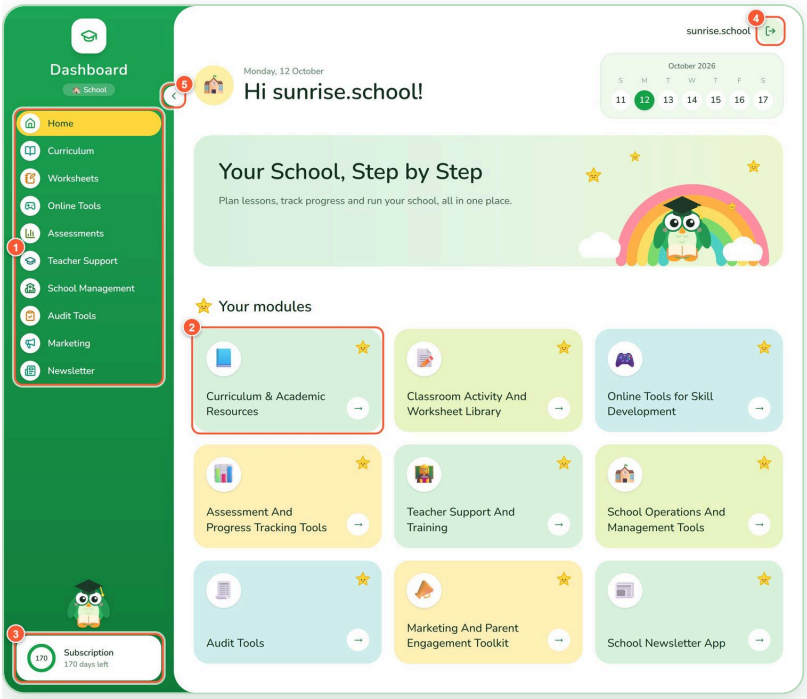

Under the sign-in card: how to subscribe and who to call.

1. **Read what is included** — the platform brings together 30+ essential tools and resources for academics, classroom, assessment, teachers, management and parent engagement.
2. **Subscribe online:** press the blue **Subscribe Now** button (secure payment through Razorpay). **Or** call or email the team — they are happy to help you subscribe.
3. **Wait for your login.** After your subscription is activated you will receive your **Login ID and Password**, and the team will contact you shortly.
4. **Sign in** as described in section 1.1.

Phone: +91 80879 24064 / +91 91751 84064 **Email:** info@adiuvaret.in

1.4 Your Dashboard: a quick tour

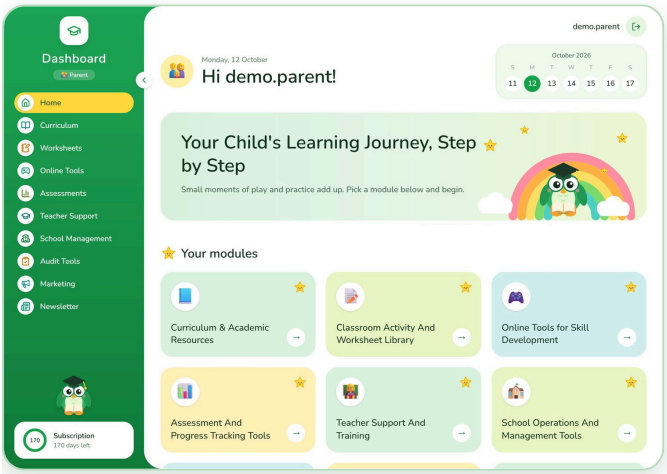

After you sign in you land on **Home**. Every page uses the same layout, so once you know this screen you can find your way anywhere.

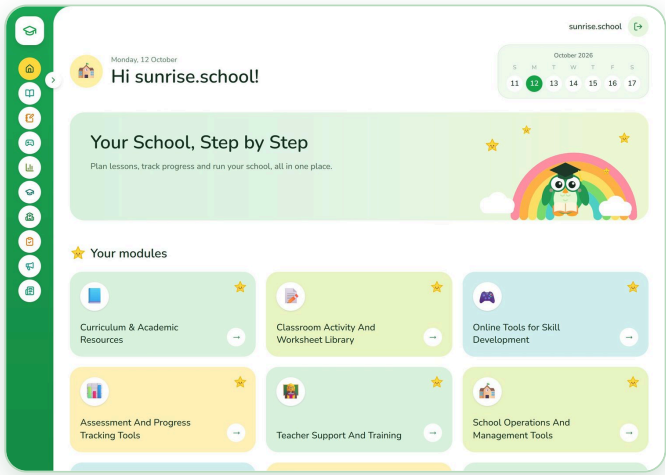

The Home page of a School account.

1. **The menu** (left side) lists all nine learning areas. Tap one to open it. The **yellow bar** shows where you are right now.
2. **The module cards** show the same nine areas as big, colourful cards. Tap any card to open it — the little arrow tells you it will take you somewhere.
3. **The subscription card** shows how many days you have left. The circle holds the number.
4. **The Logout button** sits at the top right, next to your name. Use it when you have finished (see 1.7).
5. **The fold-away arrow** shrinks the menu to icons only, giving your pages more room. Tap it again to bring the names back. The site remembers your choice.

At the top of Home you will also see a friendly greeting with today's date, and a small calendar of the current week with today highlighted in green.

*A **Parent** account: the greeting and banner speak to parents.*

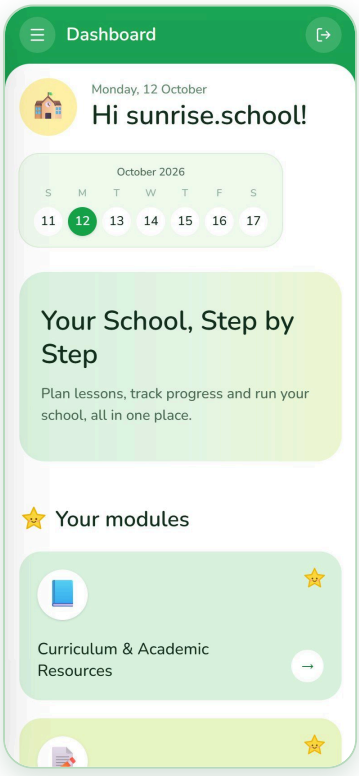

The menu folded down to icons only.

What is inside each area?

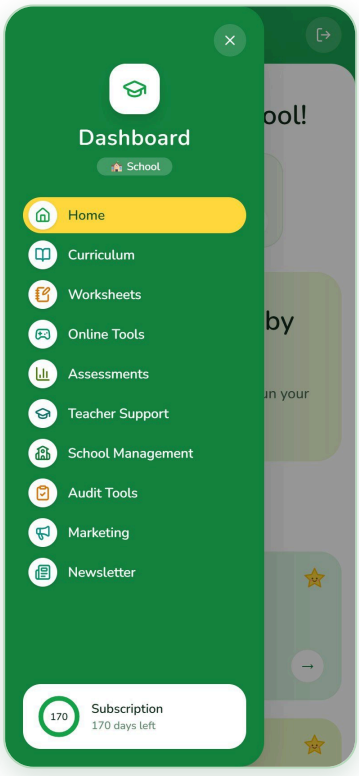

Area	What you will find	Guide
📘 **Curriculum**	LEMCore and ACT curriculum, parent counselling tools	2.1
📝 **Worksheets**	Month-wise, summer and colouring worksheets	2.2
🎮 **Online Tools**	Rhyming, literacy and numeracy games	2.3
📊 **Assessments**	Diagnostic, monthly, summative, nutritional and screening tools	2.4
👩‍🏫 **Teacher Support**	Training courses and free coupons	2.5
🏫 **School Management**	Admission form and test, session plan builder, sound books	2.6
📋 **Audit Tools**	Toy and material audit sheets	2.7
📣 **Marketing**	Admission document builder and outreach planner	2.8
📰 **Newsletter**	A monthly school newsletter maker	2.9

1.5 Using ECCE Tool on a phone or tablet

The site fits small screens too. On a phone the menu hides itself to leave room for your page, and a round button opens it when you need it.

The menu is hidden.

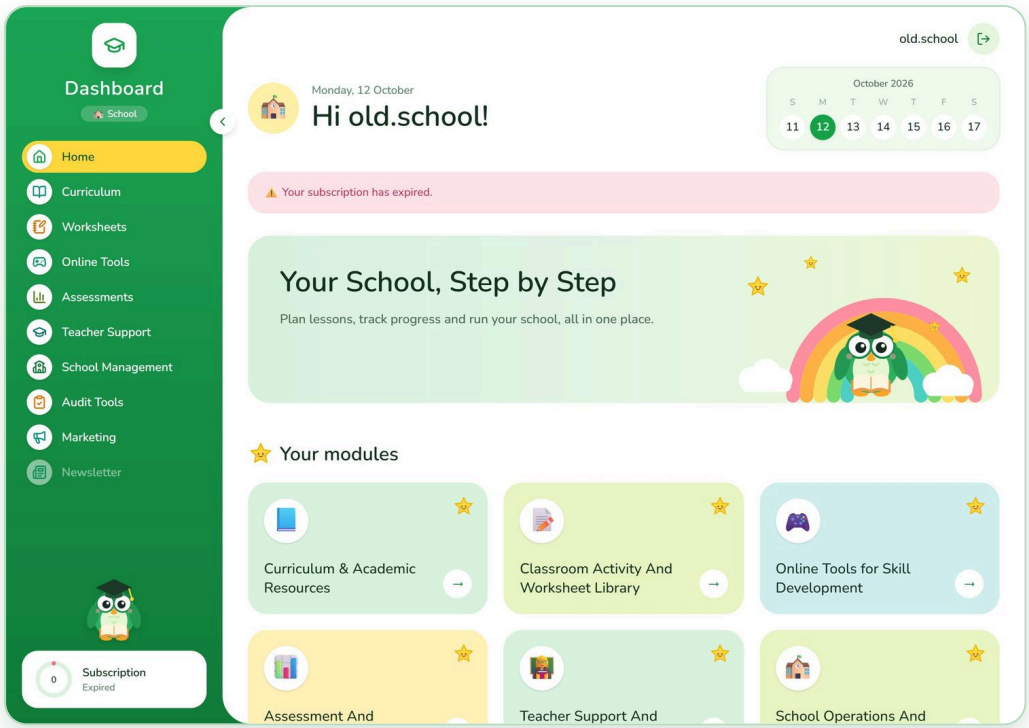

Tap the round button to open it.

1. Tap the **round menu button** (three lines) at the top left to open the menu.
2. Tap the area you want. The menu closes by itself and your page opens.
3. To close the menu without choosing, tap the ✕ button or tap the dark area outside it.
4. The **Logout** icon is at the top right of every page.

> 💡 **Tip.** Forms, worksheets and printing are most comfortable on a tablet or computer. For the Sound Books and games, a tablet is perfect for little fingers.

1.6 Your subscription: days left, and what happens at the end

Your access lasts until the **end date** of your subscription. The card at the bottom of the menu counts the days down for you.

When a subscription has ended: a pink notice at the top, the counter shows 0, and the Newsletter menu item is greyed out.

- **While active:** the card shows *"170 days left"* (your own number will differ).
- **When it ends:** a pink message says *"Your subscription has expired."*, the card says *Expired*, and the **Newsletter** menu item is greyed out. The next time you try to sign in you will see *"Subscription expired"*.
- **To renew:** contact the team (section 5.4). They update your end date.

> 💡 **Tip.** After your renewal is done, **sign out and sign in again** so your Dashboard picks up the new end date. Ask for renewal a week early so you never have a gap.

1.7 Signing out safely

1. Press the round **Logout** button (a small box with an arrow). On a computer it is at the top right, beside your name. On a phone it is at the top right of the screen.
2. You return to the Sign In page.

> ⚠️ **Please note.** On a shared or school computer, **always press Logout**. Simply closing the browser window does not sign you out, so the next person could open your Dashboard.

1.8 Downloads, printing and “Coming Soon”

You see…	What happens	Helpful to know
View & Download Open Worksheet	The file (usually a PDF) opens in a **new tab**.	Use the download or print icons at the top of that tab. If nothing opens, your browser may have blocked the pop-up — allow pop-ups for this site and try again.
Print Print as PDF Download PDF (Session Plan, online assessments, Newsletter)	Your computer's **print window** opens.	To make a PDF file, choose **Save as PDF** in the “Destination” list. To print on paper, choose your printer. Under “More settings” switch on **Background graphics** so the colours print.
Coming Soon	The item is being prepared.	It will switch to a normal button when it is ready. Right now this applies to the Toy & Material Audit sheets and the Nursery, LKG and UKG Sound Books.
Sounds and read-aloud buttons (**Listen**)	Your device speaks the word.	Turn the volume up. Google Chrome gives the most reliable sound.

PART 2

The nine learning areas

Step-by-step help for every tool in your Dashboard: what it is for, where to find it, and exactly what to press.

For: Parents and Schools

All nine areas are open to both Parent and School accounts. Not sure where to begin? Use this quick suggestion:

Parents will enjoy

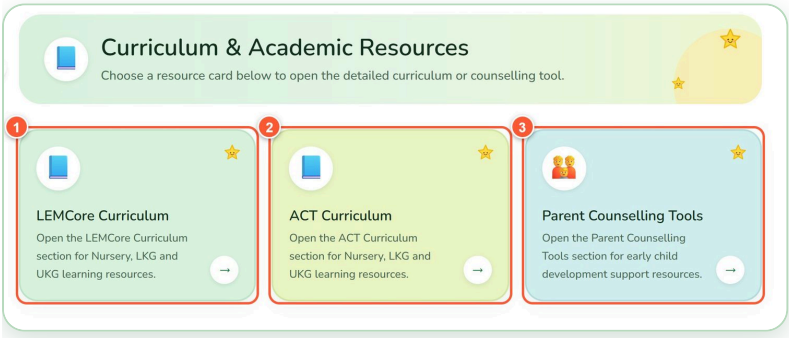

Online Tools (games) · Worksheets · Parent Counselling Tools · Nutritional Assessment · Sound Books

Schools will use everything

Curriculum · Session Plan · Assessments · Admission tools · Marketing · Newsletter · Teacher training · Audits

2.1 Curriculum & Academic Resources

Ready-made yearly plans and weekly lessons for Nursery, LKG and UKG, plus checklists to share with parents.

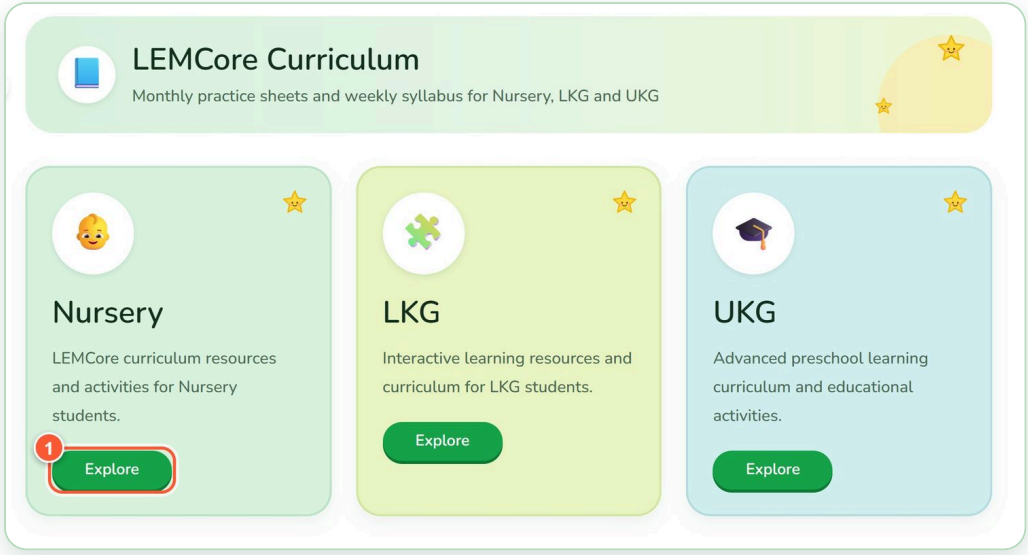

Curriculum & Academic Resources: three cards.

1. **LEMCore Curriculum** — monthly practice sheets and weekly teaching plans.
2. **ACT Curriculum** — weekly curriculum and skill-based learning PDFs.
3. **Parent Counselling Tools** — skill checklists to share with parents.

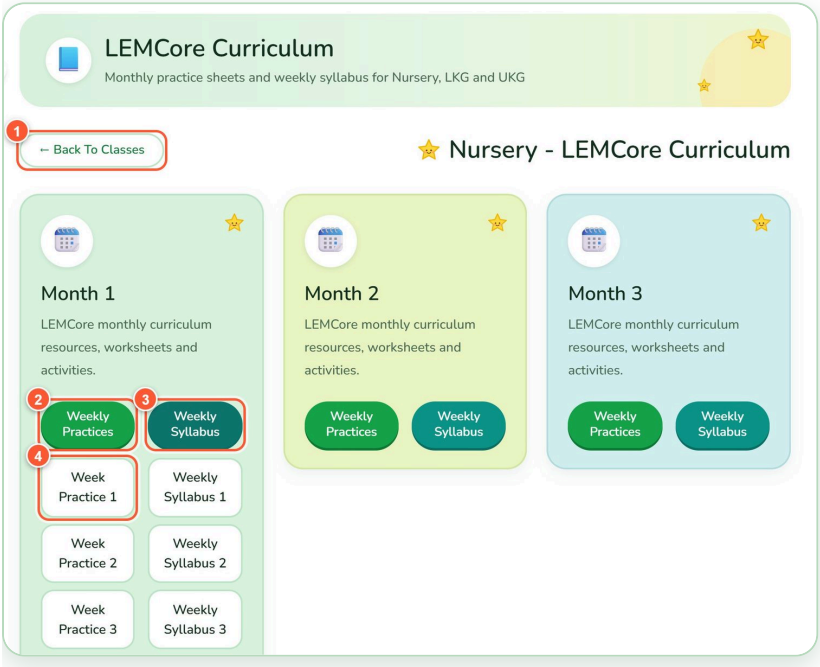

LEMCore Curriculum

Open it from the first card. First choose a class by pressing **Explore** under **Nursery**, **LKG** or **UKG**.

Pick your class: press Explore.

You now see **Month 1 to Month 8**. Each month has two buttons that open a short list when you press them.

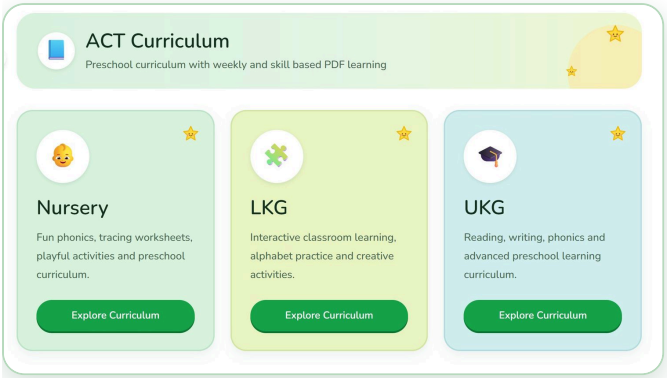

A class's months. Pressing the two buttons opens the weekly lists.

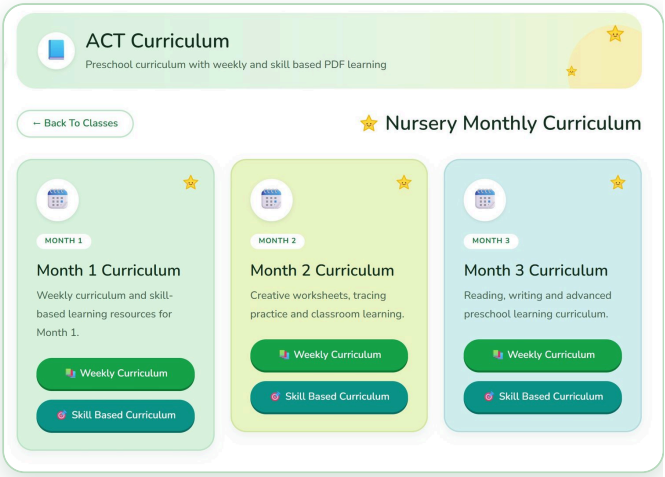

1. **← Back To Classes** takes you back if you chose the wrong class.
2. **Weekly Practices** opens *Week Practice 1 to 4* — the practice pages for each week.
3. **Weekly Syllabus** opens *Weekly Syllabus 1 to 4* — the teaching plan for each week.
4. **Press a week** to open its PDF in a new tab. Read it on screen, or download or print it.

> **Tip.** You can open both lists in the same month at once. Press a button a second time to fold its list away.

ACT Curriculum

Choose a class.

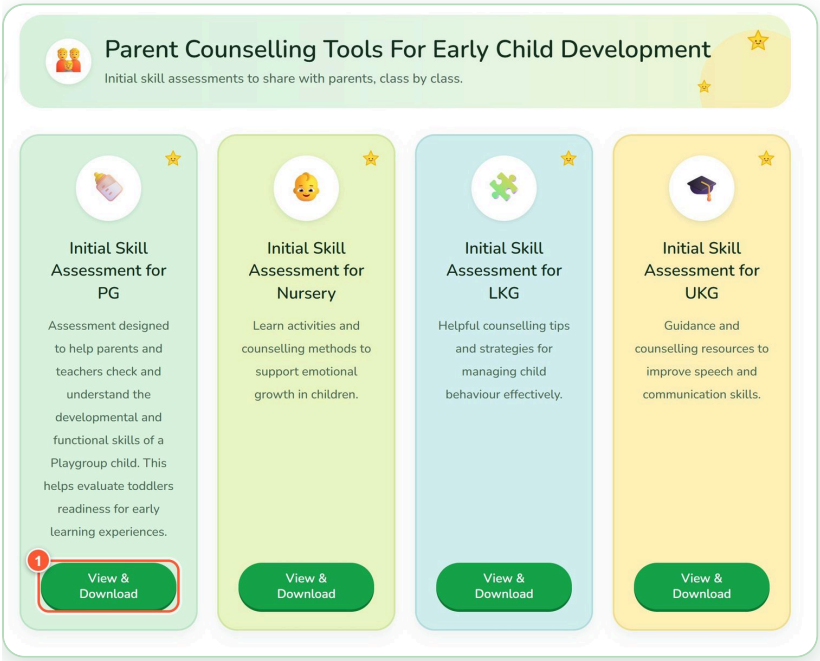

Each month has two buttons.

1. Press **Explore Curriculum** under your class.
2. On the month you want, press **Weekly Curriculum** for the week-by-week PDFs, or **Skill Based Curriculum** for PDFs organised by skill.
3. Press the file you want. It opens in a new tab.

Good to know. The ACT Curriculum currently lists Months 1 to 3 for each class. More months appear here as they are added.

Parent Counselling Tools

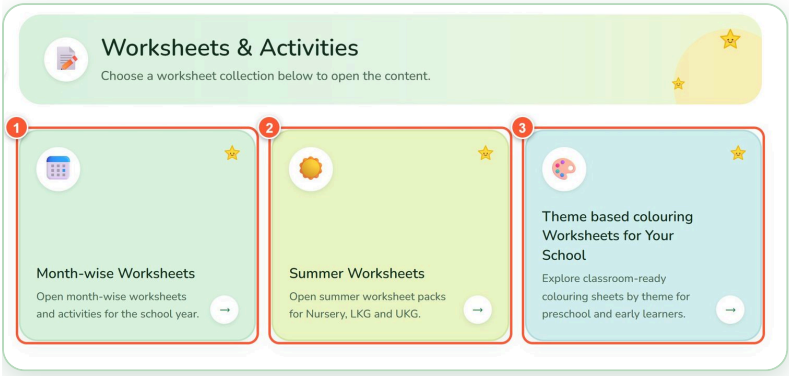

Four initial skill assessments, one for every class.

1. Find the card for the class: **PG, Nursery, LKG or UKG**.
2. Press **View & Download**. The PDF opens in a new tab — print it or send it to the parent.

The **Initial Skill Assessment** helps parents and teachers check and understand a child's developmental and functional skills, so they know how ready the child is for early learning.

2.2 Worksheets & Activities

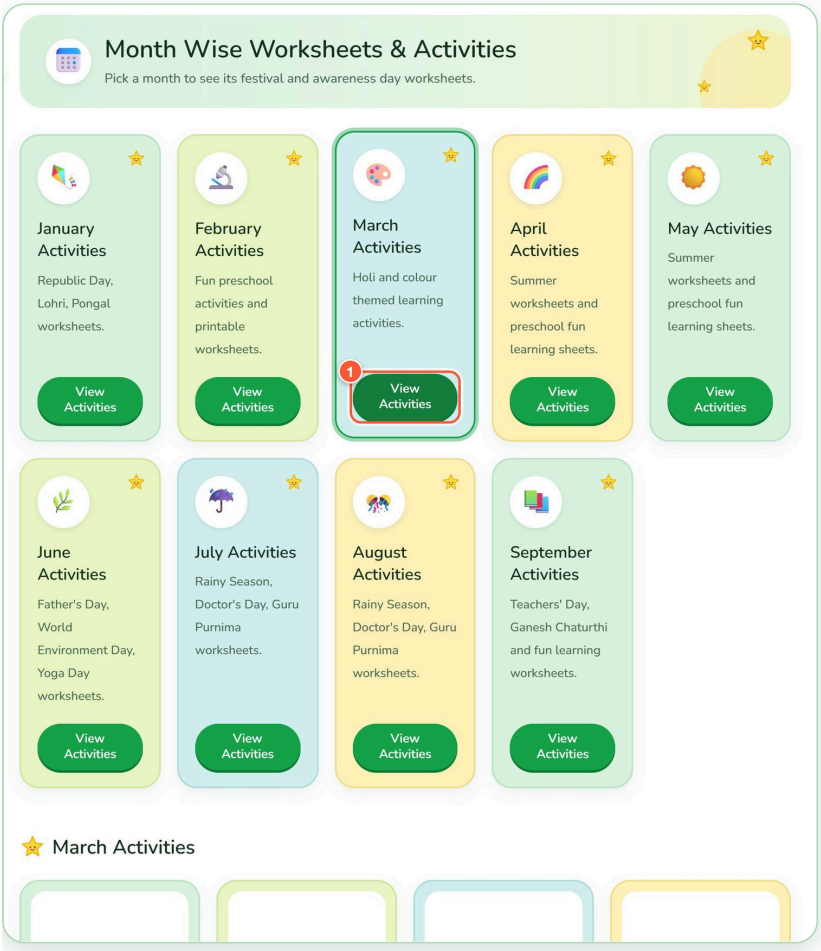

Printable worksheets, grouped three ways. Open the area, then pick a collection.

Three worksheet collections.

1. **Month-wise Worksheets** — festival and awareness-day sheets, month by month.
2. **Summer Worksheets** — holiday homework packs for Nursery, LKG and UKG.
3. **Theme based colouring Worksheets** — colouring pages sorted by theme.

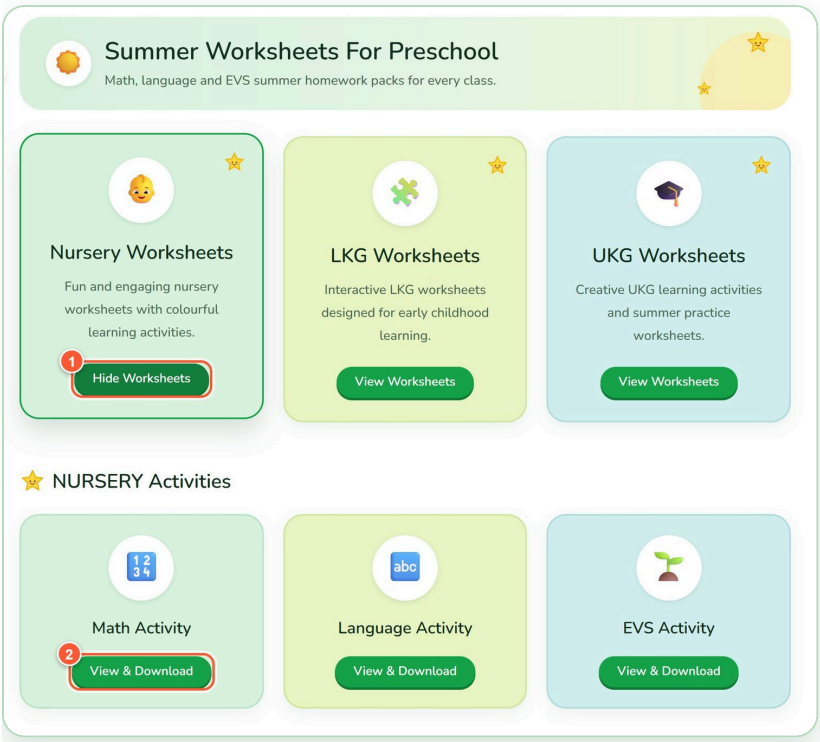

Month-wise Worksheets

Pick a month; its worksheets appear underneath.

1. Press **View Activities** on the month you want (January to September). *January is shown first when the page opens.*
2. **Scroll down.** The month's worksheets appear as pictures, such as Holi, National Cereal Day or Ram Navmi.
3. Press **Open Worksheet** under the one you want. The PDF opens in a new tab, ready to print.

Summer Worksheets

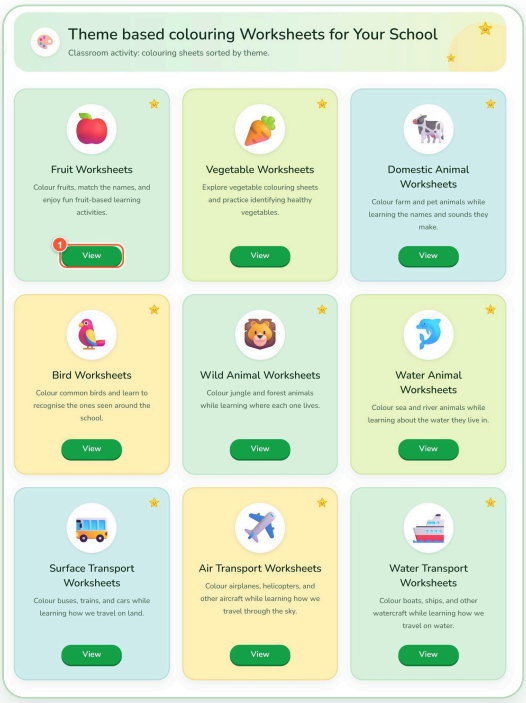

Summer packs: Math, Language and EVS for each class.

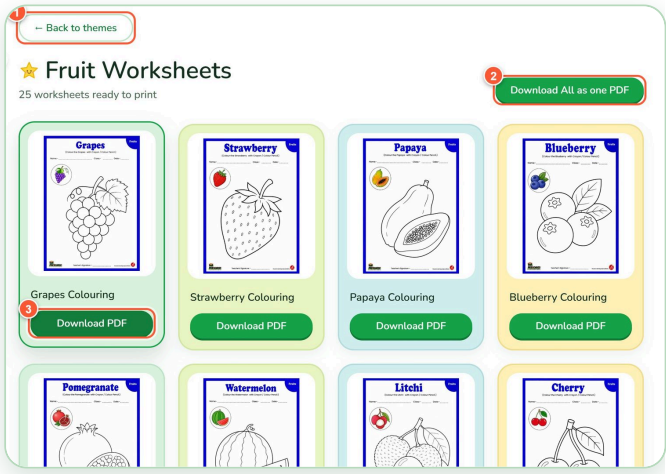

1. Press **View Worksheets** under **Nursery, LKG or UKG**. The button changes to **Hide Worksheets**; press it again to close the list.
2. Three cards appear: **Math Activity**, **Language Activity** and **EVS Activity**. Press **View & Download** on the one you need.

Theme based colouring Worksheets

There are **nine themes**. Press **View** on one: **Fruit, Vegetable, Domestic Animal, Bird, Wild Animal, Water Animal, Surface Transport, Air Transport** or **Water Transport**.

*The nine themes: press **View** on one.*

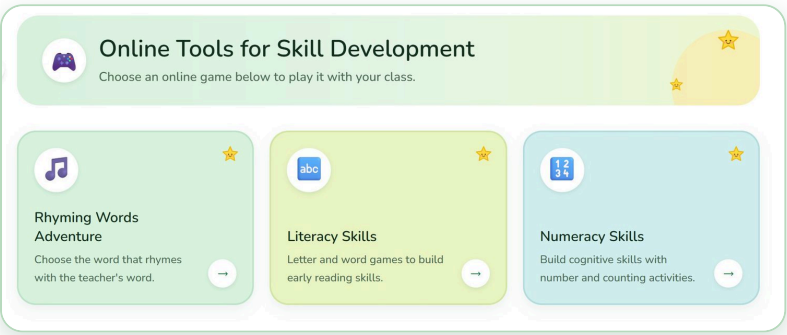

Inside a theme: every sheet, with download buttons.

1. **← Back to themes** returns you to the nine themes.
2. **Download All as one PDF** gathers every sheet in the theme into **one PDF** for printing in one go. A message such as *Preparing 3/25…* shows the progress, then *"Saved all 25 worksheets into one PDF"*.
3. **Download PDF** saves just the one sheet you chose.

> **Good to know.** If a single sheet cannot be turned into a PDF, its button changes to **Open in new tab**. Press it and save the picture from there.

2.3 Online Tools for Skill Development

Playful on-screen games to practise rhymes, letters and numbers. A teacher can run them with the whole class, or a child can play with a parent. Right answers earn stars.

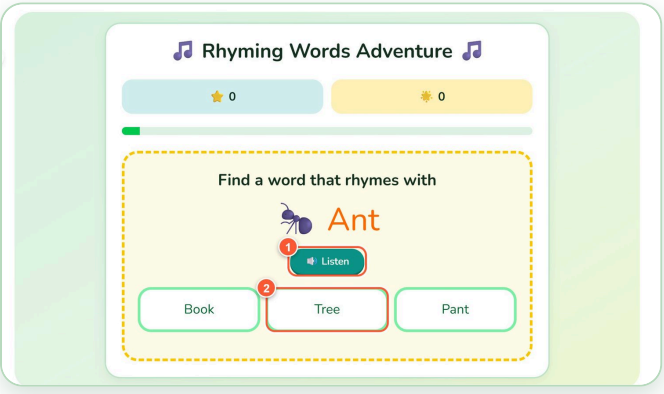

Three games. Press a card to open it.

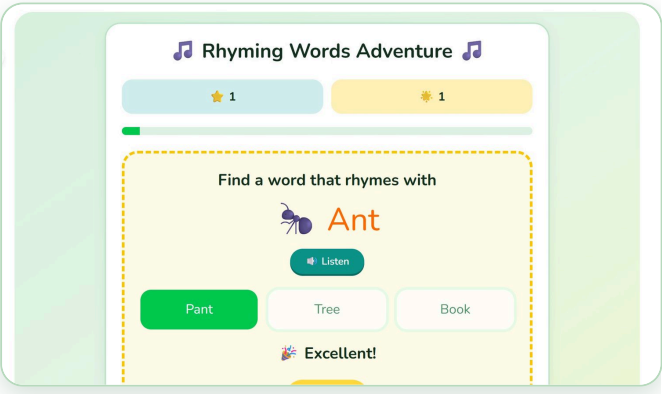

- **Rhyming Words Adventure** — choose the word that rhymes.
- **Literacy Skills** — letter and word games.
- **Numeracy Skills** — number and counting games.

Rhyming Words Adventure

Choose a level — **Nursery** (easy), **LKG** (medium) or **UKG** (advanced) — and press **▶ Play Now**.

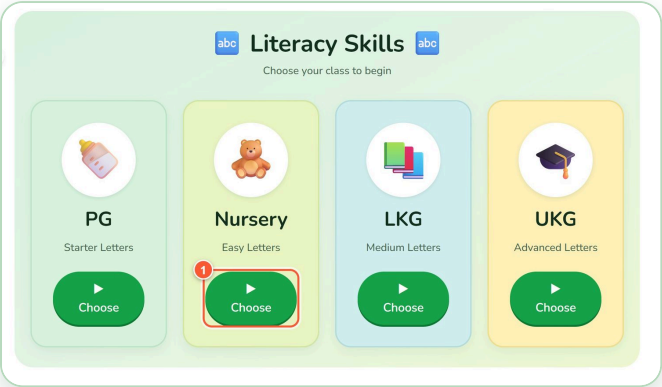

A question: which word rhymes with "Ant"?

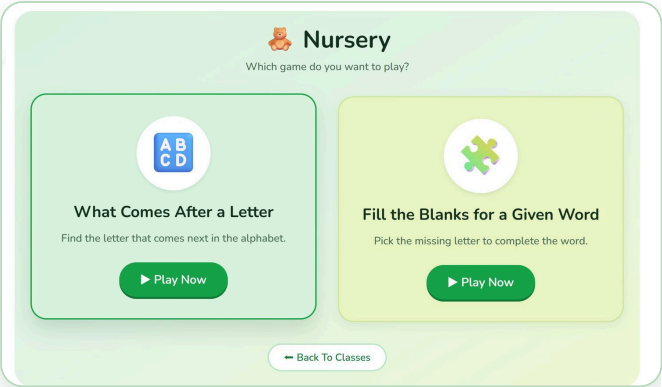

After answering: green is right, red is not.

1. Press **Listen** to hear the word read aloud.
2. **Tap the word that rhymes.** The right answer turns green; a wrong choice turns red. You see *"Excellent!"* or a kind *"Good Try!"*.
3. Press **Next →** for the next word. The two boxes at the top count your stars, and the bar shows your progress. At the end you see *"Wonderful!"* with your score, and can press **Back To Levels**.

Literacy Skills

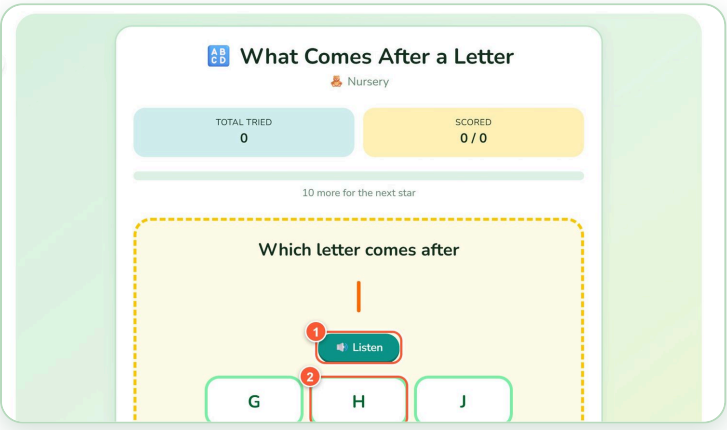

Step 1: choose a class.

Step 2: choose a game.

- **Choose your class:** PG (starter letters), Nursery (easy), LKG (medium) or UKG (advanced) — press **▶ Choose**.
- **Choose a game:** *What Comes After a Letter* (find the next letter of the alphabet) or *Fill the Blanks for a Given Word* (pick the missing letter). Press **▶ Play Now**.

Then, on the question screen:

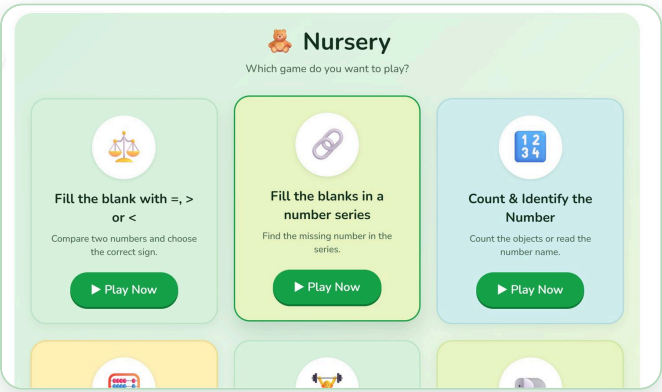

A game in progress.

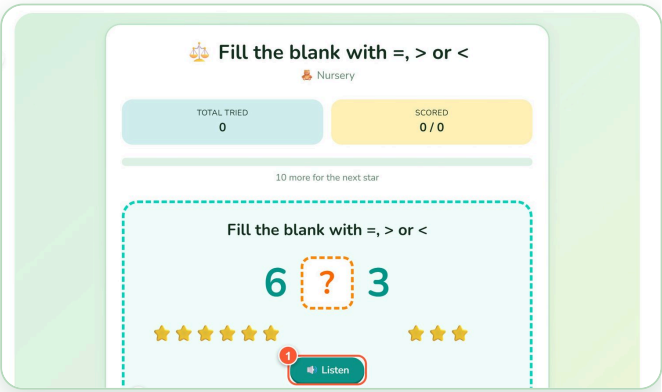

1. Press **Listen** to hear the question read aloud.
2. **Tap an answer.** The scoreboard shows *Total Tried* and *Scored*, and you earn a star after every 10 questions.

> **Good to know.** The questions keep coming until you decide to stop. Press **Finish & See Score** to see how you did, or **Back To Games** to leave.

Numeracy Skills

Six number games to choose from.

A question: which sign goes in the box?

- **Choose your class.** The numbers grow with the class: PG 1–5, Nursery 1–10, LKG 1–20, UKG up to 100.

- **Choose a game** and press Play Now: *Fill the blank with =, > or <* · *Fill the blanks in a number series* · *Count & Identify the Number* · *Identify More or Less* · *Identify Heavy or Light* · *Identify Big or Small* (this one first asks you to pick a category such as Vehicles, Domestic Animals, Wild Animals, Water Animals or Birds).

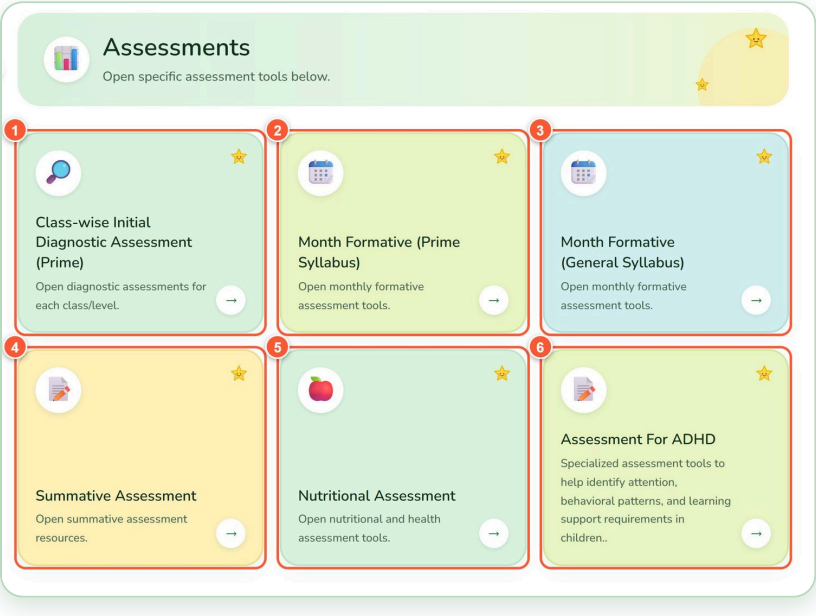

Then, on the question screen:

1. Press **Listen** if a child needs the question read aloud.
2. **Tap the correct choice** (for example the >, < or = sign).

> **Tip.** Playing together works best: the teacher (or parent) reads, the child taps. On a classroom TV or projector, let children come up and press the answer themselves.

2.4 Assessments & Progress Tracking

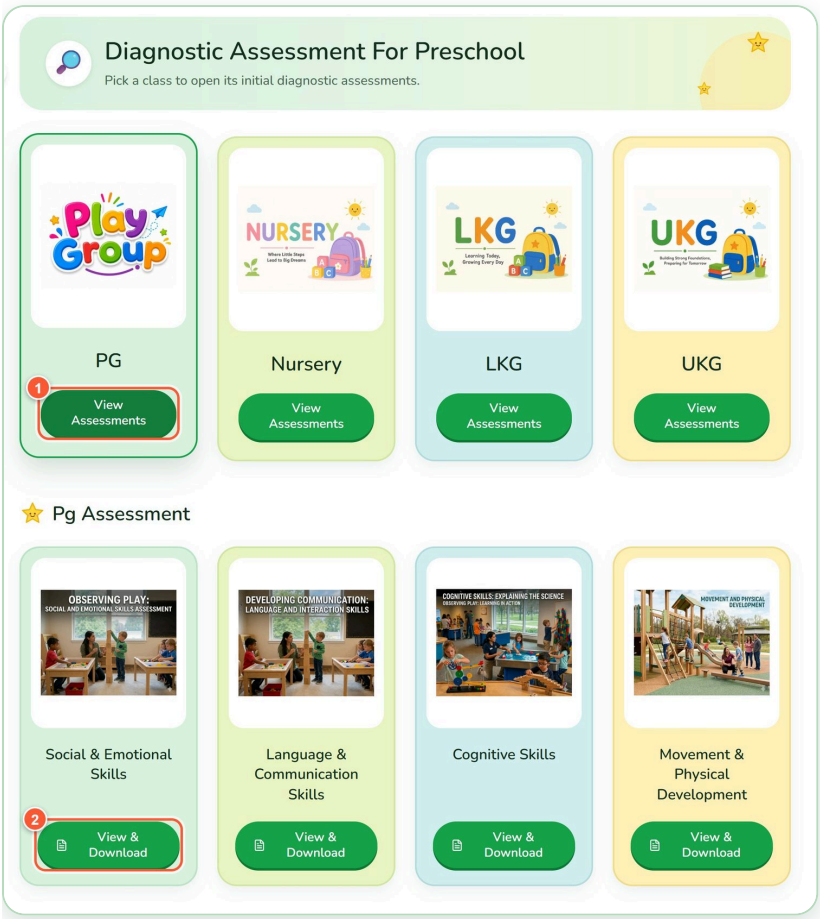

Six tools to find out where each child stands, track progress through the year, and notice when a child might need extra support.

Six assessment tools.

1. **Class-wise Initial Diagnostic** — a starting check for each class.
2. **Month Formative (Prime Syllabus)** — a check for every month; do it on screen or print it.
3. **Month Formative (General Syllabus)** — two formative papers per class.
4. **Summative Assessment** — mid-term and end-term exam papers.
5. **Nutritional Assessment** — works out a child's daily calorie need.
6. **Assessment for ADHD** — screening tools to share with parents.

Class-wise Initial Diagnostic (Prime)

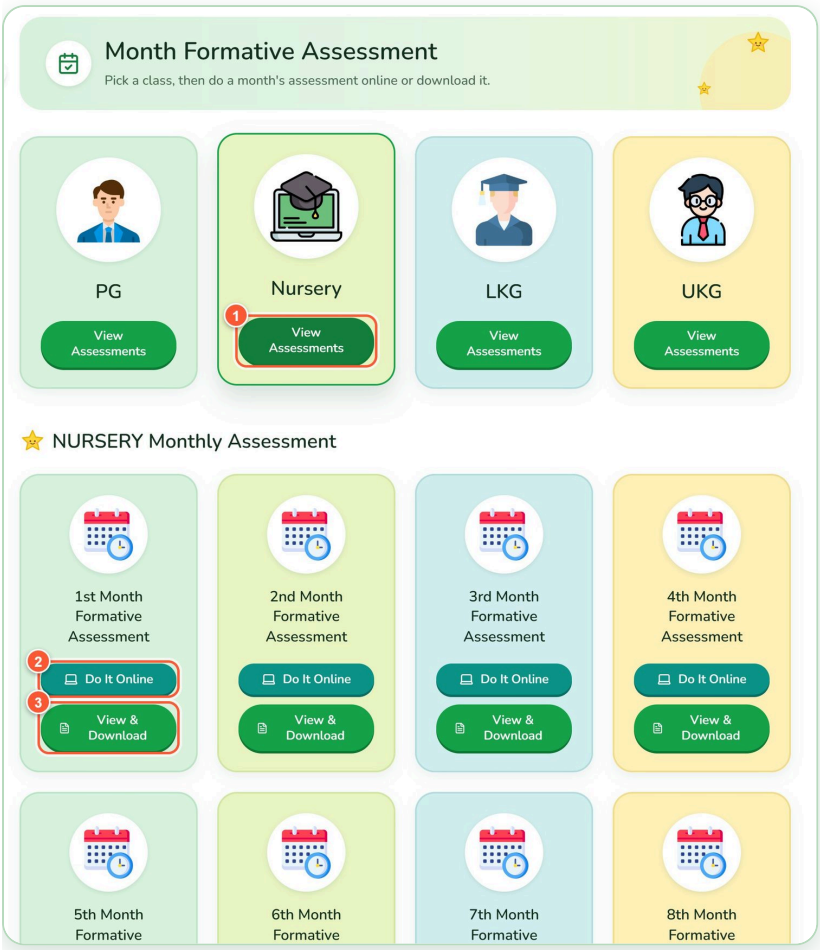

Choose a class, and its skill assessments appear below.

1. Press **View Assessments** under **PG, Nursery, LKG or UKG**.
2. Four skill cards appear below — **Social & Emotional**, **Language & Communication**, **Cognitive** and **Movement & Physical Development**. Press **View & Download** on the one you need.

> **Tip.** Use these at the start of the year (or when a child joins) to see where each child is beginning from.

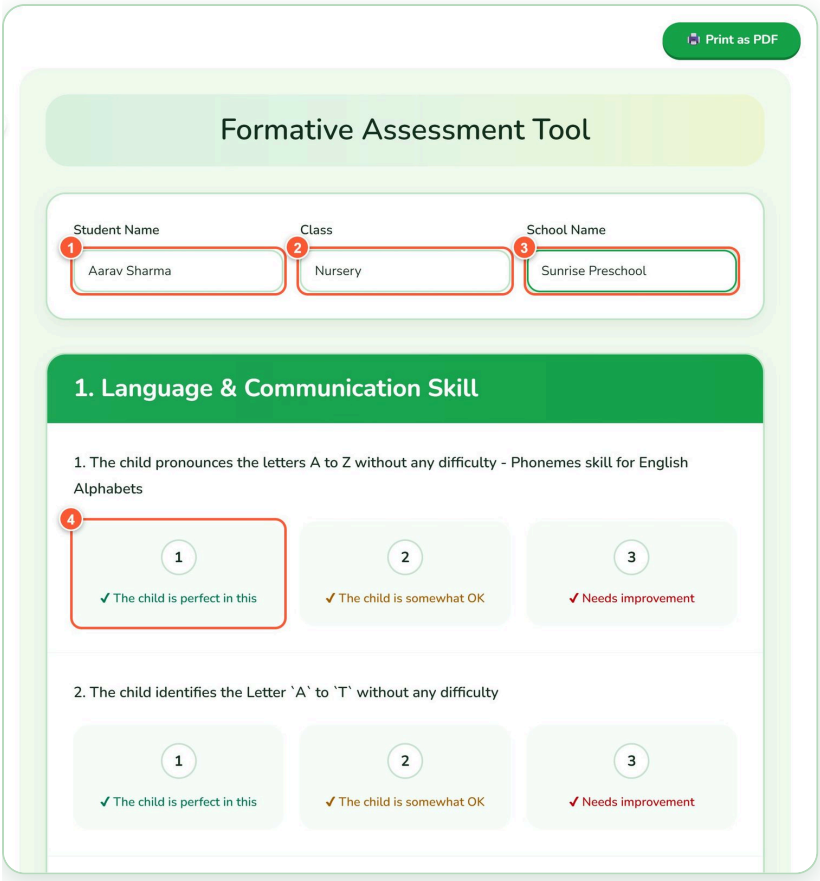

Month Formative (Prime Syllabus)

Pick a class, then a month. Every month can be done online or downloaded.

1. Press **View Assessments** under your class. Eight cards appear: the **1st to 8th Month Formative Assessment**.
2. **Do It Online** opens a fill-in form on the screen (shown next).
3. **View & Download** opens the printable PDF version instead.

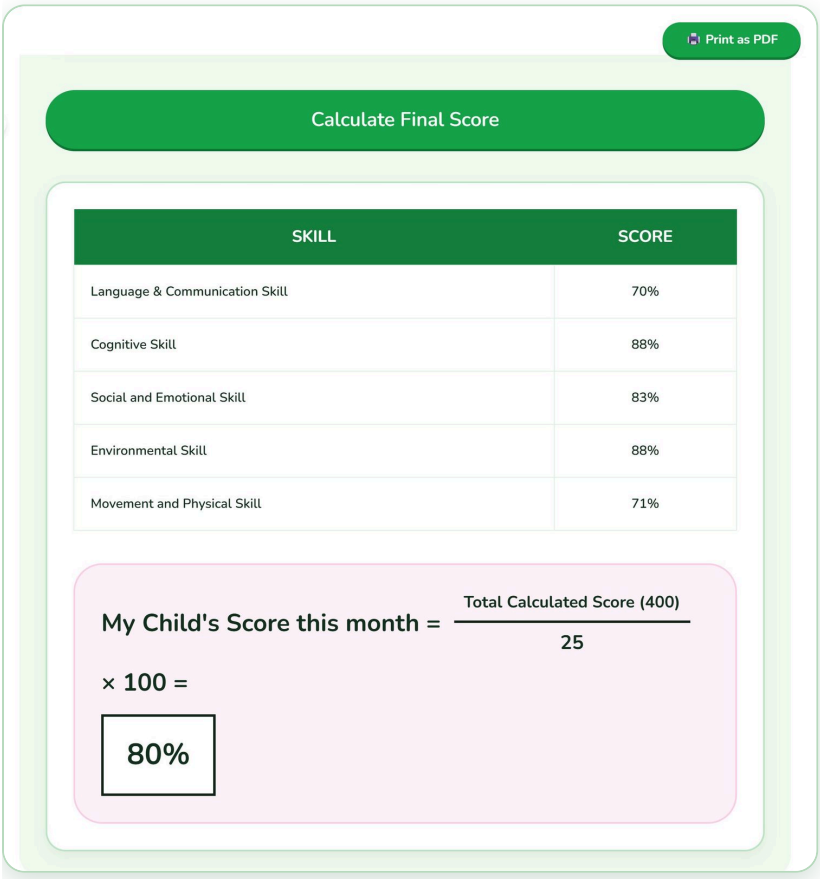

Filling in the online monthly check

The online form: child details first, then statements about the child.

1. Type the **Student Name**.
2. Type the **Class**.
3. Type the **School Name**.
4. Read each statement about the child, then tap **one of three boxes**: **1 The child is perfect in this** **2 The child is somewhat OK** **3 Needs improvement**. The box you tap lights up green, yellow or red.

The statements are grouped in five skill areas: **Language & Communication**, **Cognitive**, **Social & Emotional**, **Environmental** and **Movement & Physical**.

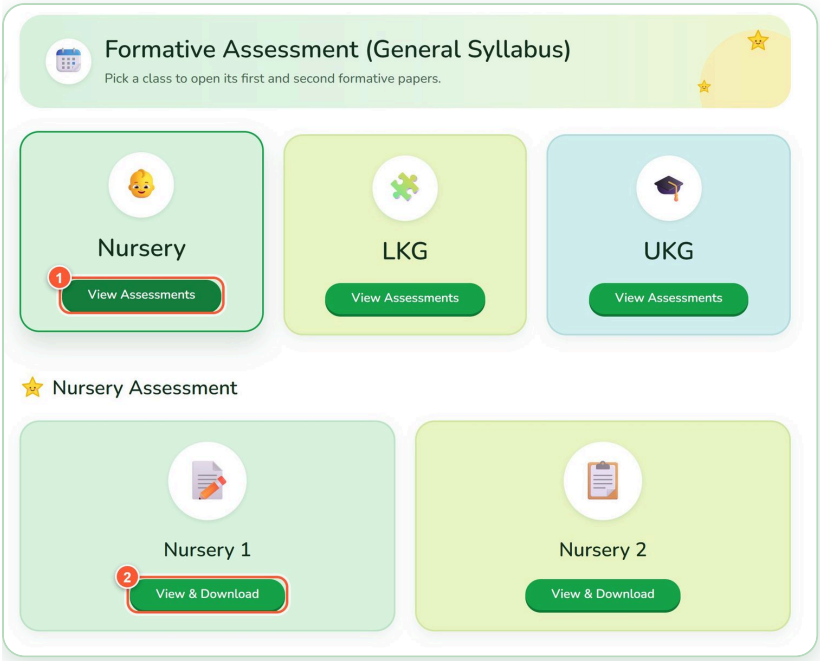

At the bottom of the form: a score for each skill area and an overall score.

When you scroll to the bottom you see the **results table**: a percentage for each skill area, and *"My Child's Score this month"* as one overall percentage.

Good to know. The scores work themselves out **as you tap** — you do not need to press anything. (The green *Calculate Final Score* bar above the table is just a heading; the numbers below are already up to date.)

Please note. Your answers are **not stored** on the site. Before you leave the page, press **Print as PDF** (top right) and save a copy for the child's file.

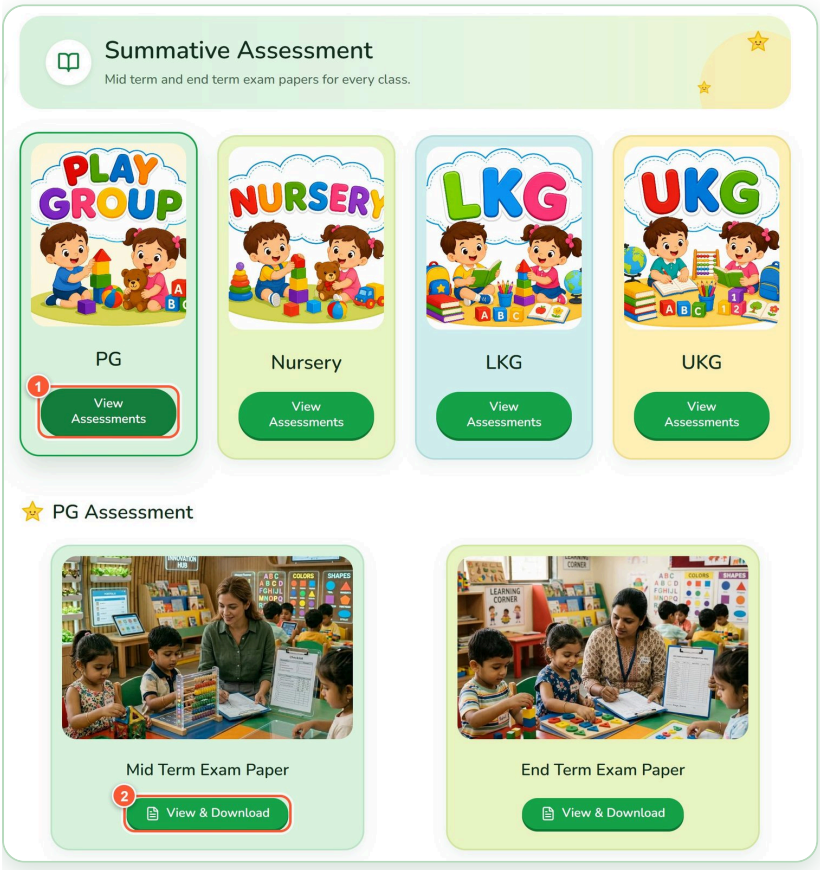

Month Formative (General Syllabus)

Choose a class to see its first and second formative papers.

1. Press **View Assessments** under **Nursery, LKG or UKG**.
2. Two papers appear (for example *Nursery 1* and *Nursery 2*). Press **View & Download** to open one.

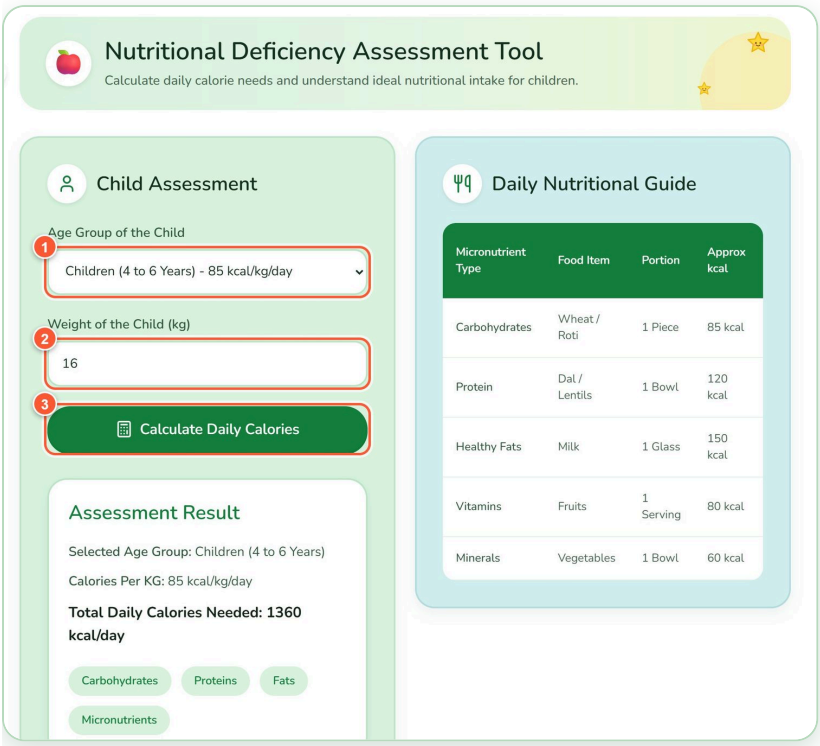

Summative Assessment

Mid-term and end-term exam papers for every class.

1. Press **View Assessments** under **PG, Nursery, LKG or UKG**.
2. Press **View & Download** on **Mid Term Exam Paper** or **End Term Exam Paper**.

Nutritional Assessment

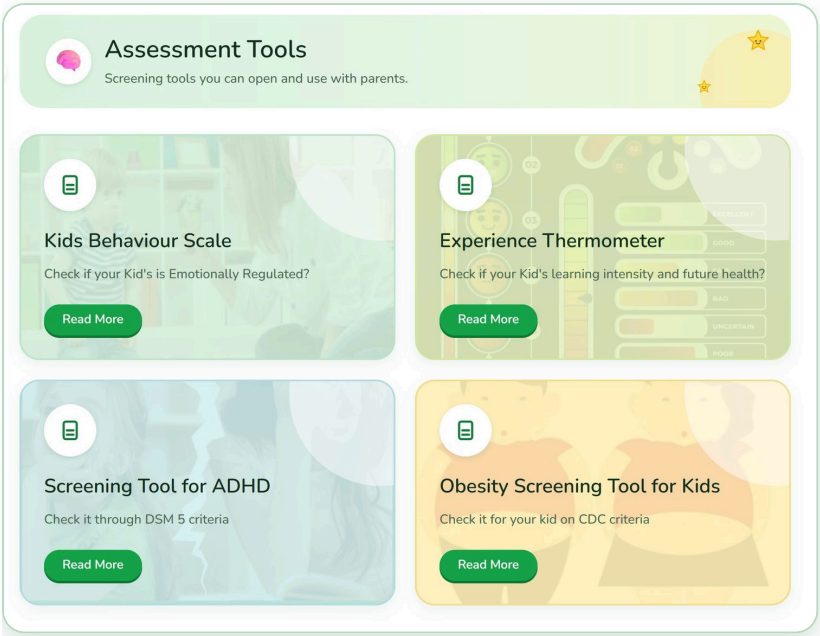

Choose an age group, enter the weight, and read the result.

1. Open the list **Age Group of the Child** and choose one: Infants (up to 1 year), 1–3 years, 4–6 years, 7–9 years or 10–12 years.
2. Type the child's **weight in kilograms**.
3. Press **Calculate Daily Calories**. The **Assessment Result** shows the calories needed per kilo and the **Total Daily Calories Needed** (for example, 85 × 16 kg = 1360 kcal a day).

On the right of the screen, the **Daily Nutritional Guide** lists everyday foods — wheat, dal, milk, fruits, vegetables — with a typical portion, calories and the ideal share of the day's intake.

Good to know. This tool is a simple guide. For any worry about a child's diet or growth, please speak to a doctor or dietitian.

Assessment for ADHD (screening tools)

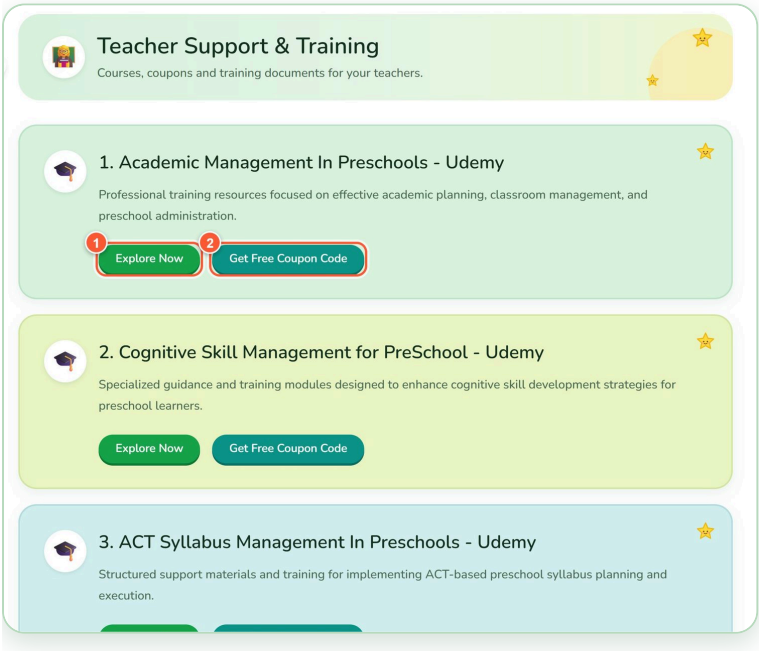

Four screening tools, each with a Read More button.

1. Choose a tool: **Kids Behaviour Scale** (is the child emotionally regulated?), **Experience Thermometer** (learning intensity and future health), **Screening Tool for ADHD** (based on DSM-5 criteria) or **Obesity Screening Tool for Kids** (based on CDC criteria).
2. Press **Read More**. The tool opens in a new tab.

⚠️ **Please note.** Screening tools help you *notice* patterns — they do not diagnose. Share any concern with the child's parents and a qualified professional. Two of the four tools (Experience Thermometer and Obesity Screening) are still being prepared and may not open yet.

2.5 Teacher Support & Training

Online courses and training documents for your teaching team. Every course has a free-coupon page.

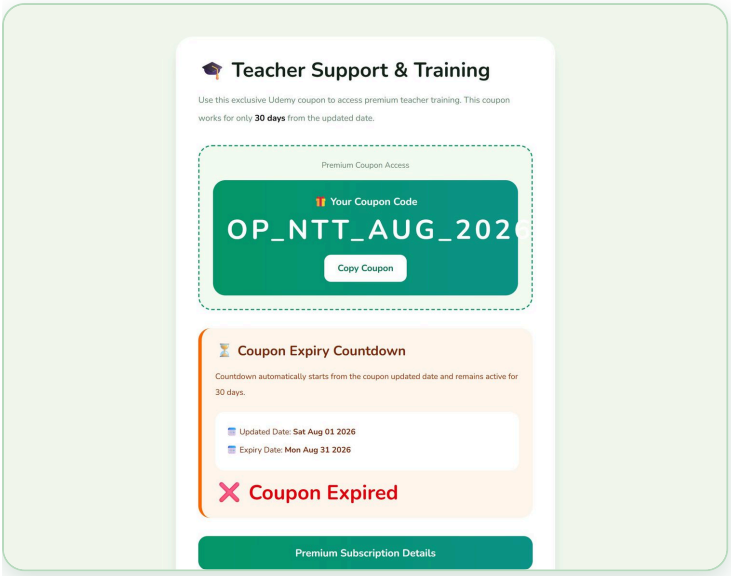

The courses: each card has two buttons.

1. **Explore Now** opens the course page on **Udemy** (a separate learning website) in a new tab.
2. **Get Free Coupon Code** opens a page with a free coupon code for that course.

The six items: 1 Academic Management in Preschools · 2 Cognitive Skill Management for PreSchool · 3 ACT Syllabus Management in Preschools · 4 Language Development through Shared Book Reading Technique · 5 Management of Assessment and Evaluation in Preschools · 6 NTT Program Documents (₹299 per volume; nursery teacher training reference material).

Using a coupon

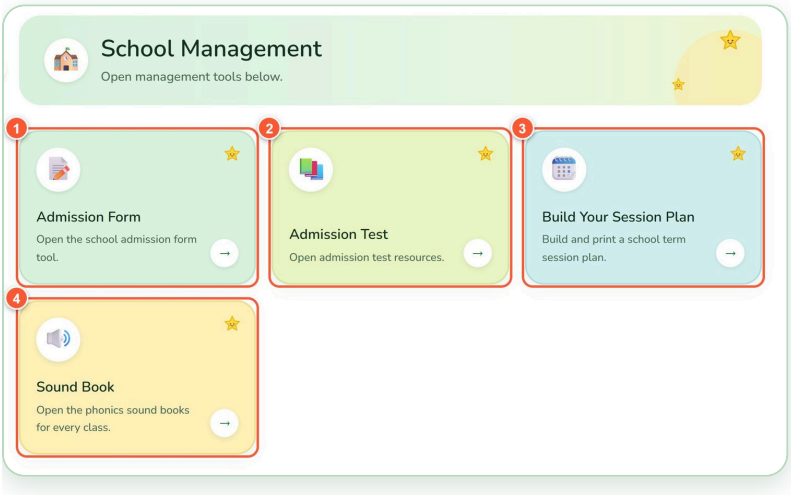

The coupon page: the code, and a countdown.

1. Press **Get Free Coupon Code** beside the course you want.
2. Press **Copy Coupon**. A message says *"Coupon Copied!"*.
3. Check the **Coupon Expiry Countdown**: each coupon works for **30 days** from its updated date.
4. Go back, press **Explore Now**, and paste the code in the *coupon* box at Udemy's checkout.

> **Good to know.** The coupon pages open on their own — you do not have to be signed in. If a page shows **"Coupon Expired"** in red, ask the team for the latest coupon code. The **Premium Subscription Details** button at the bottom explains how to subscribe.

2.6 School Operations & Management

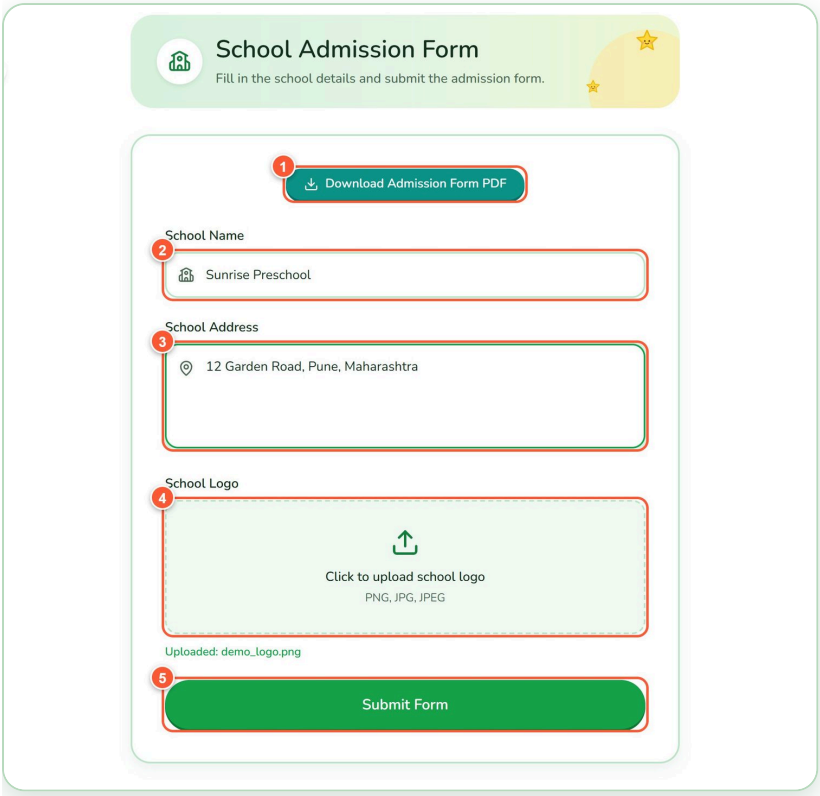

Tools that help run the school: forms, admission tests, the term planner, and the talking Sound Books.

Four management tools.

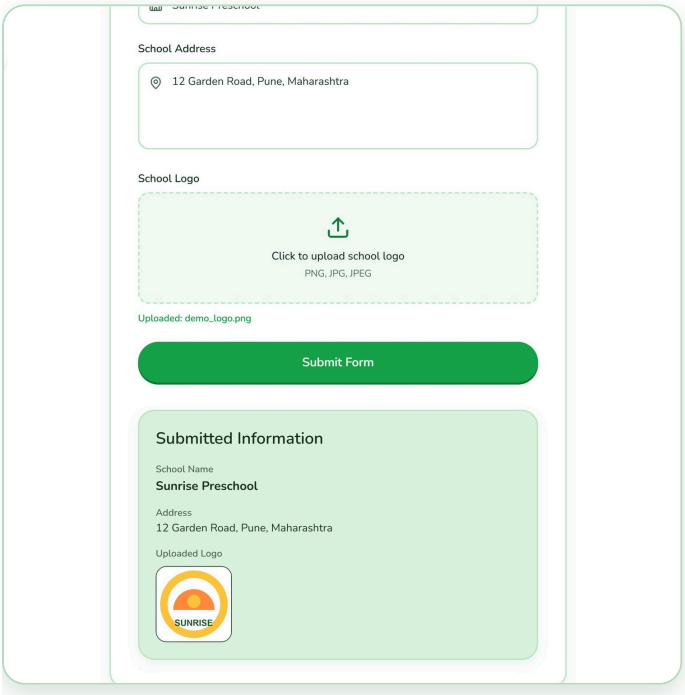

1. **Admission Form** — collect a school's details for the admission form.
2. **Admission Test** — ready tests for new admissions.
3. **Build Your Session Plan** — plan and print a whole term.
4. **Sound Book** — picture books that speak when tapped.

Admission Form

The Admission Form screen.

1. **Download Admission Form PDF** — the printable form is being prepared; for now this button shows a short message.
2. Type the **School Name**.
3. Type the **School Address**.
4. Press the dotted **logo box** and choose your school's logo picture (PNG, JPG or JPEG). The file name appears in green once it is chosen.
5. Press **Submit Form**.

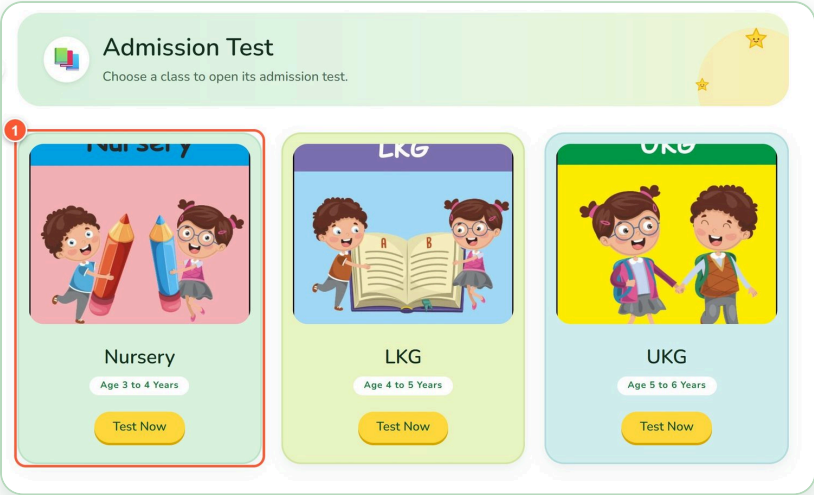

After pressing Submit Form, your details appear as a summary at the bottom.

All three details are needed — if one is missing you will see *"Please fill all fields"*.

The **Submitted Information** summary shows your name, address and logo so you can check them.

Admission Test

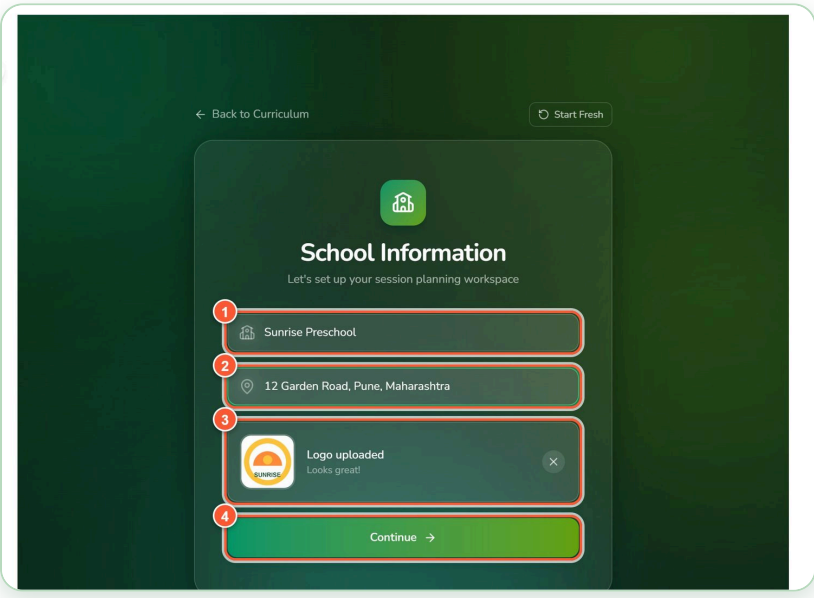

Three tests, by age group.

1. Pick the child's class: **Nursery** (age 3–4), **LKG** (age 4–5) or **UKG** (age 5–6).
2. Press **Test Now**. The test opens in a new tab.

Build Your Session Plan

The Session Plan builder lays out a whole school term — month by month, with assessments and vacations — and gives you a neat page to print. You work in **three screens**.

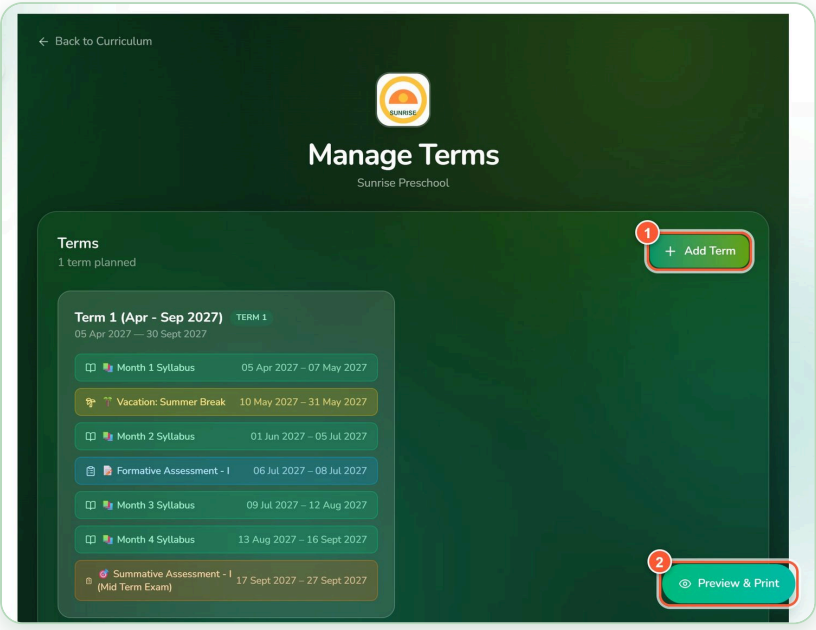

Screen A: your school's details

School Information.

1. Type your **School Name** (at least 3 letters).
2. Type your **School Address** (at least 5 letters).
3. Press the **logo box** and choose your logo picture. A small preview and *"Logo uploaded"* confirm it. Use the ✕ to remove it.
4. Press **Continue →**. (If something is missing, a red message tells you what.)

Screen B: add your terms

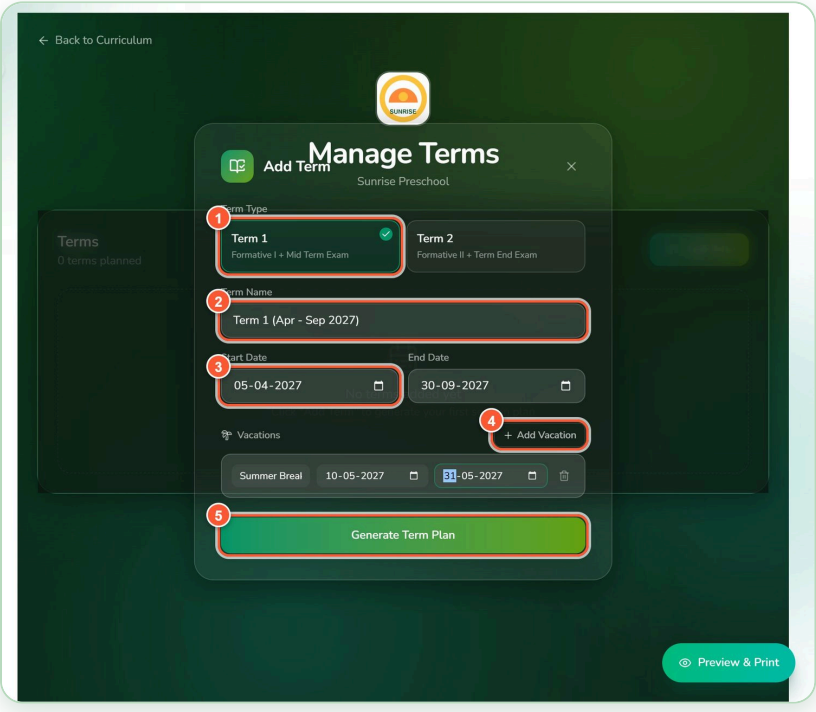

Manage Terms, here with one term already planned.

The Manage Terms screen starts empty. Press **+ Add Term** (circle 1) to open the Add Term window.

When you have finished, **Preview & Print** (circle 2, bottom right) takes you to the last screen.

To remove a term, move the mouse over its card and press the small **bin** that appears at the top right.

In the **Add Term** window:

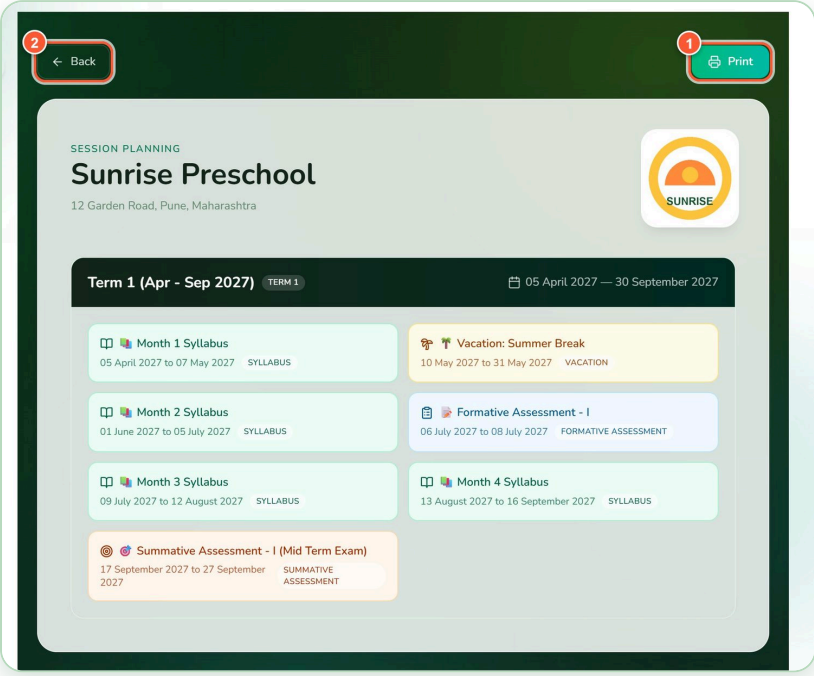

The Add Term window.

1. **Choose the term type**: **Term 1** (Formative I + Mid Term Exam) or **Term 2** (Formative II + Term End Exam).
2. **Type a name** for the term, for example *Term 1 (Apr – Sep 2027)*.
3. **Pick the Start Date and End Date** of the term.
4. Press **+ Add Vacation** for each break, then type its name and pick its first and last day. Add as many as you need. The small bin removes one.
5. Press **Generate Term Plan**. The term appears as a card on the Manage Terms screen.

How the plan is worked out. Each month of teaching is **25 working days**. A term is: Month 1, Month 2, Formative Assessment (3 days), Month 3, Month 4, then the Mid Term Exam (7 days) for Term 1, or the Term End Exam including PTM (10 days) for Term 2. Weekends and your vacations are skipped automatically. A term needs at least **110 working days** (Term 1) or **113** (Term 2); if there are too few, the site says *"Insufficient days!"* — lengthen the term or shorten a vacation.

⚠️ **Please note.** Enter **every school holiday** (Diwali, Christmas, local festivals) as a vacation. The site only knows a handful of national days, so any holiday you do not enter will be counted as a working day.

Screen C: preview and print

The finished plan, ready to print.

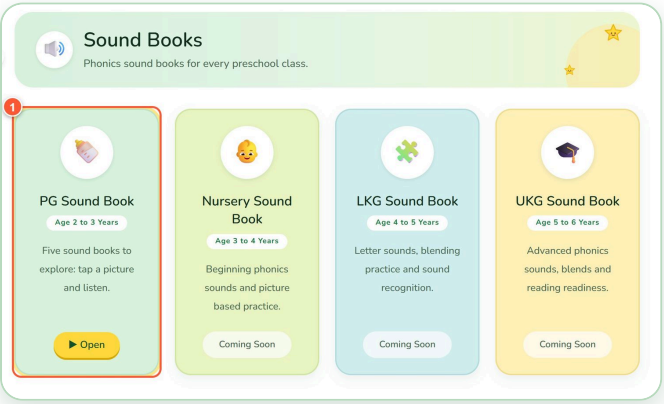

1. Press **Print**. In the print window choose **Save as PDF** (to keep a file) or your printer.
2. Press **← Back** to return and change a term.

Reach this screen from Manage Terms by pressing the green **Preview & Print** button at the bottom right.

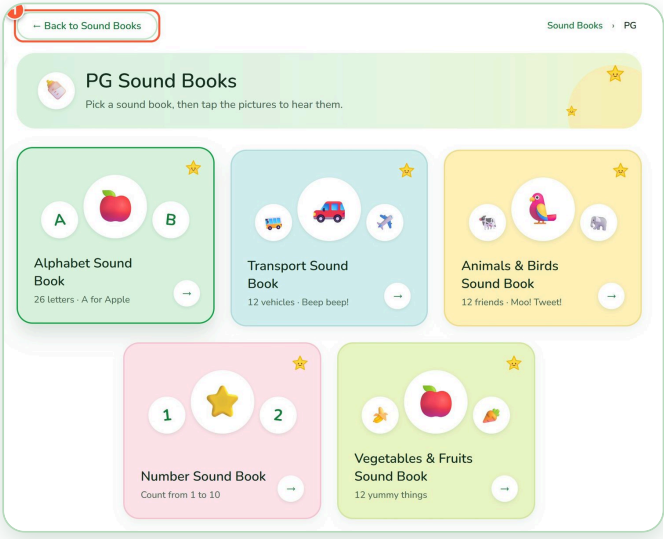

💡 **Tip.** Your plan is **saved automatically** in this browser, under your login, so you can leave and come back later. To begin a brand-new plan, press **Start Fresh** on the first screen — it clears your school details and all terms.

Sound Books

Phonics picture books that **speak**. A child taps a picture and hears it — perfect for the youngest learners. The Sound Book has three levels: class → book → pages.

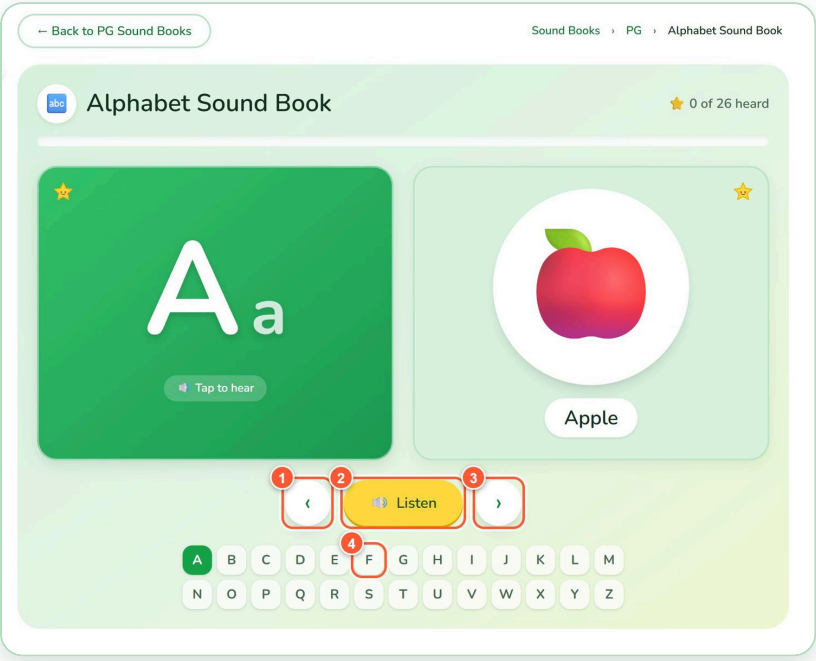

Choose a class.

PG has five books.

- Press **▶ Open** on the **PG Sound Book**. (Nursery, LKG and UKG show *Coming Soon*.)
- Choose a book: **Alphabet** (26 letters), **Transport** (12 vehicles), **Animals & Birds** (12 friends), **Number** (1 to 10) or **Vegetables & Fruits** (12).
- **Tap** the big letter or the picture to hear it.

Inside the Alphabet Sound Book.

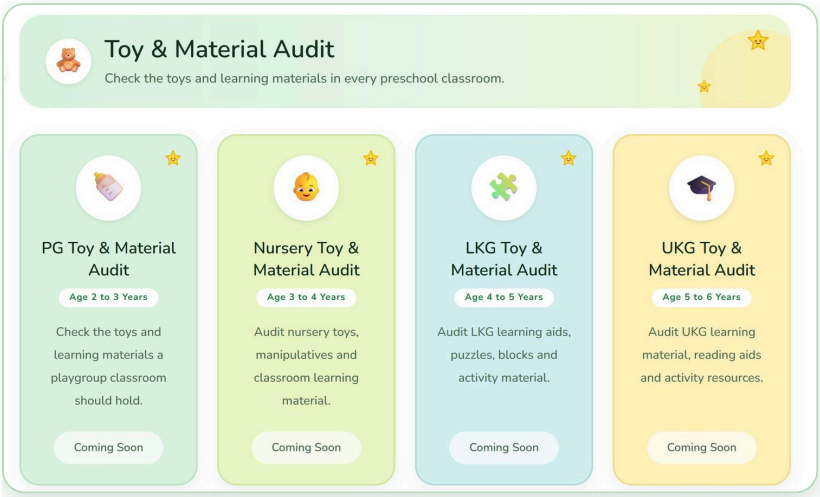

1. **‹** goes to the previous page.
2. **Listen** reads the page aloud again.
3. **›** turns to the next page. Each new page is read aloud by itself, so a child can keep going.
4. The **letter strip** lets you jump straight to any page.

The counter **"⭐ 0 of 26 heard"** and the coloured bar fill up as the child listens. When everything has been heard, confetti falls and a celebration message appears. Use **← Back** or the trail at the top (*Sound Books › PG › Alphabet*) to step back one level.

Good to know. The voice comes from your device, so it may sound a little different on different devices. If you see *"This browser cannot play the sounds. Please try Chrome."*, open the site in Google Chrome.

2.7 Audit Tools

Checklists for making sure every classroom has the toys and learning materials it should.

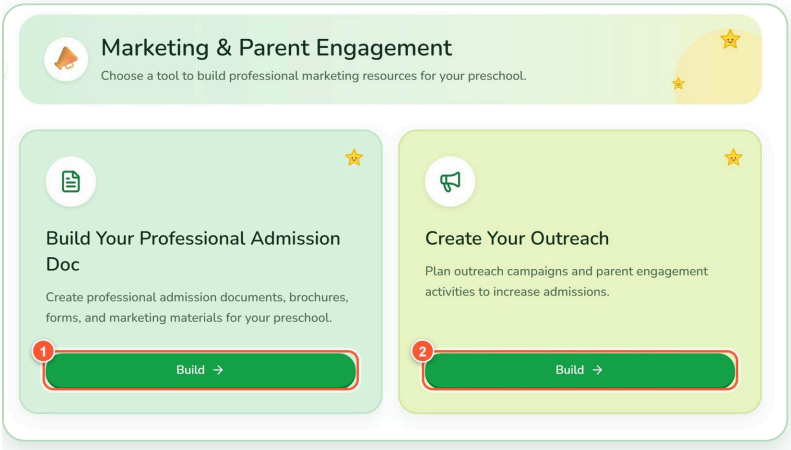

Toy & Material Audit: one card for each class.

1. Open **Audit Tools** and press the **Toy Material** card.
2. Choose the class: **PG** (age 2–3), **Nursery** (3–4), **LKG** (4–5) or **UKG** (5–6).
3. When a sheet is ready, press **View & Download** to open and print it, then walk through the classroom ticking what you find.

> **Good to know.** The four audit sheets currently say **Coming Soon**. Each one turns into a View & Download button the moment it is published.

2.8 Marketing & Parent Engagement

Two guided builders that turn a few choices into a professional PDF you can share with parents.

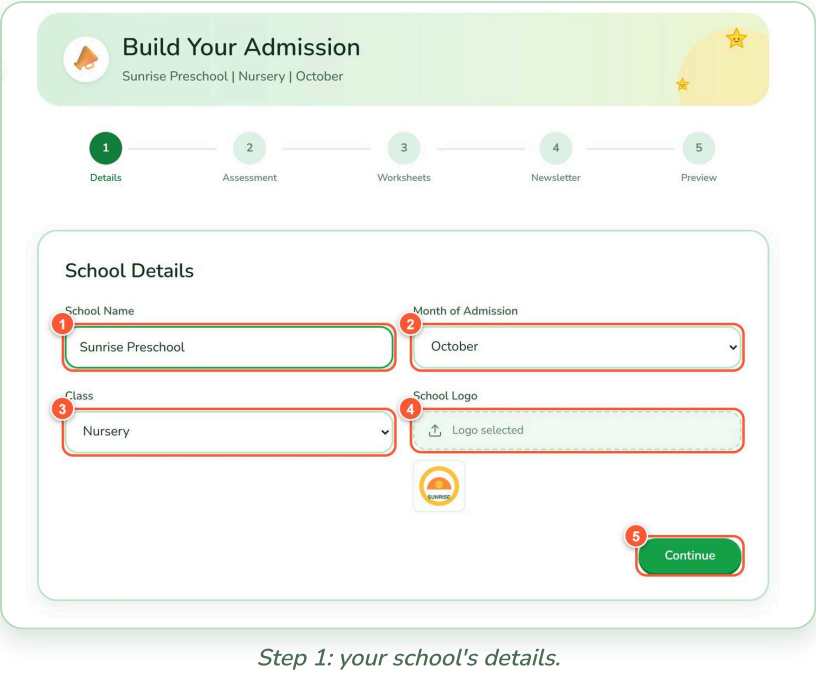

Two builders.

1. **Build Your Professional Admission Doc** — a document for parents who are considering admission. Press **Build →**.
2. **Create Your Outreach** — plan events and visits to promote your school. Press **Build →**.

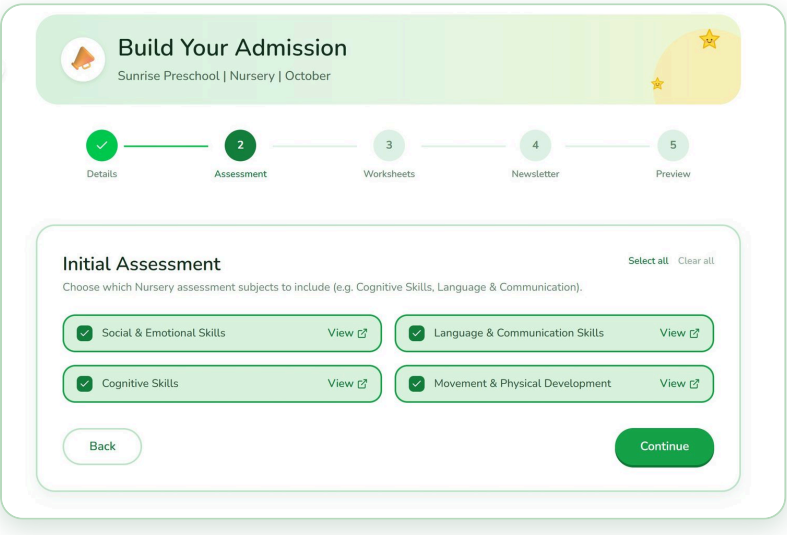

Admission Doc builder (five steps)

A bar at the top shows your five steps: **Details** → **Assessment** → **Worksheets** → **Newsletter** → **Preview**. Press **Continue** to move on and **Back** to step back. Finished steps show a tick, and you can tap them to revisit.

Step 1: your school's details.

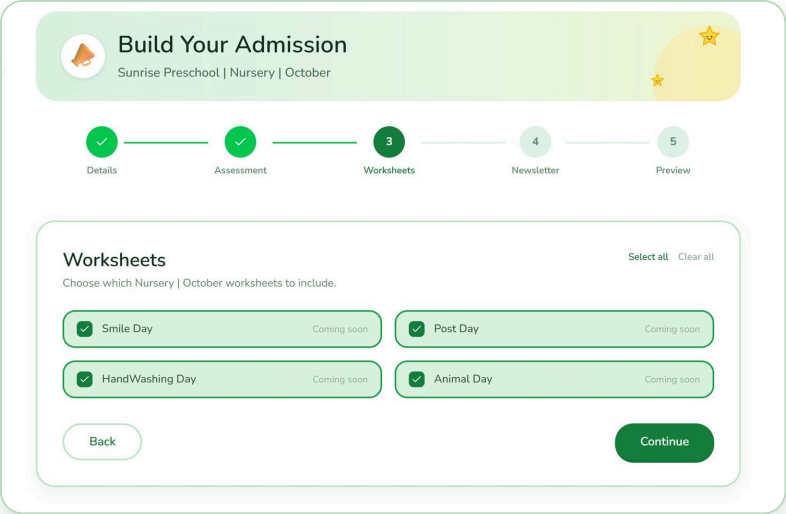

1. Type the **School Name**.
2. Choose the **Month of Admission**.
3. Choose the **Class**: PG, Nursery, LKG or UKG.
4. Press the **School Logo** box and choose your logo. (Optional, but it makes your document look professional.)
5. Press **Continue**. (It stays pale until the school name is typed.)

Step 2: choose which assessments to include.

Step 2 — Assessment. Tick the assessment areas you want in your document (all are ticked to start). *Select all* and *Clear all* save time; *View* lets you peek at one first.

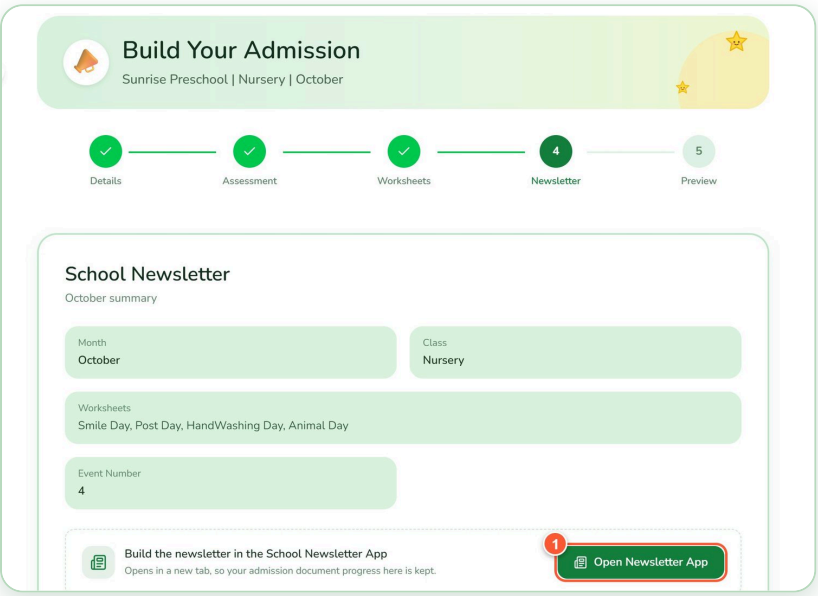

Press **Continue** when you are happy.

Step 3: choose which worksheets to include.

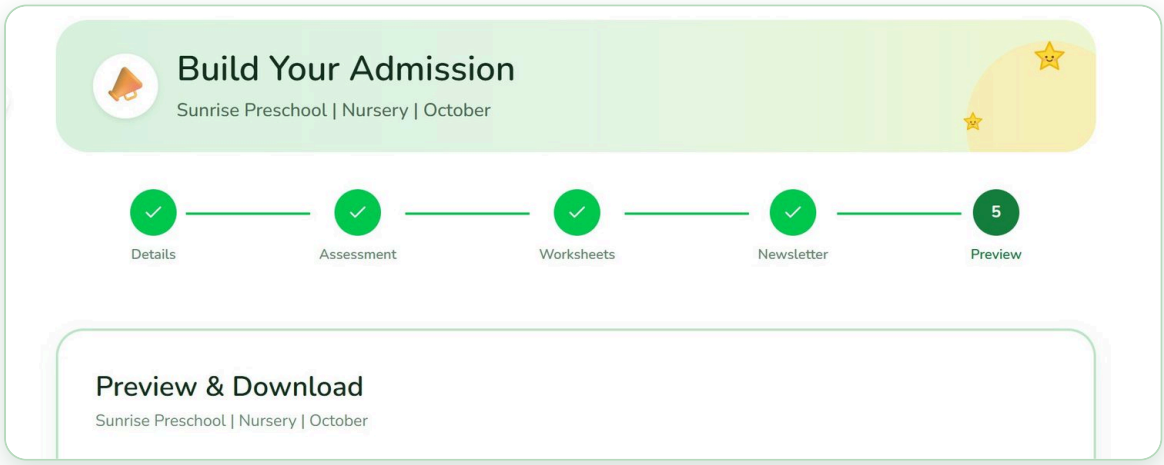

Step 3 — Worksheets. The same idea, with the worksheets for the month and class you chose. Anything marked *Coming soon* is not published yet.

Press **Continue** to go on.

Step 4: add your school newsletter (optional).

1. Press **Open Newsletter App**. It opens in a **new tab**, so your progress here is kept. Build your newsletter there (see 2.9), then press *"Done — Return to Admission Doc"* and close that tab.
2. No newsletter this time? Press **Skip**.
3. Press **Continue** to go to the last step.

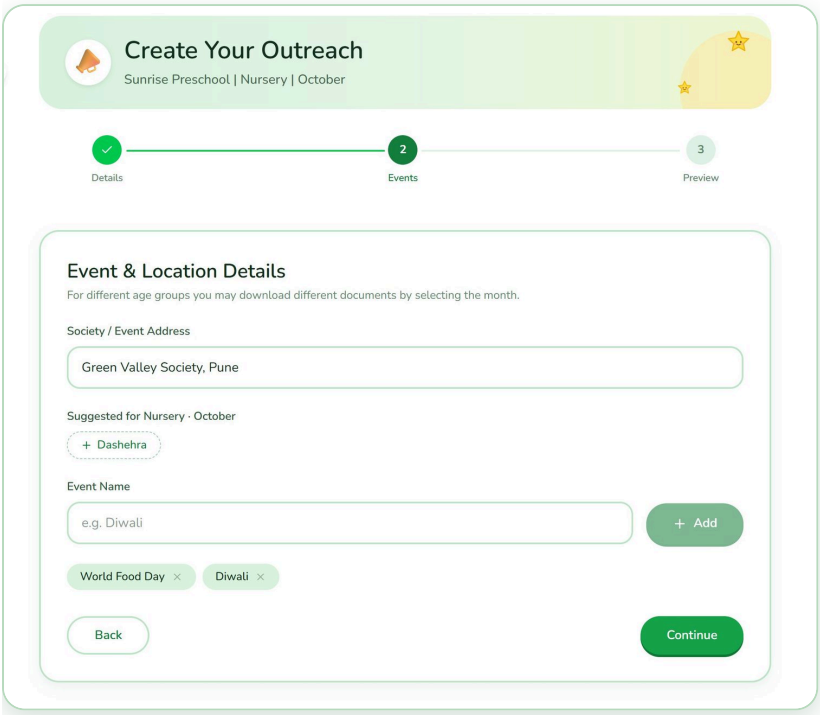

Step 5: Preview & Download.

1. Press **Preview PDF** to see the document, or **Download PDF** to save it. Buttons say *Building…* for a few seconds while the PDF is made.

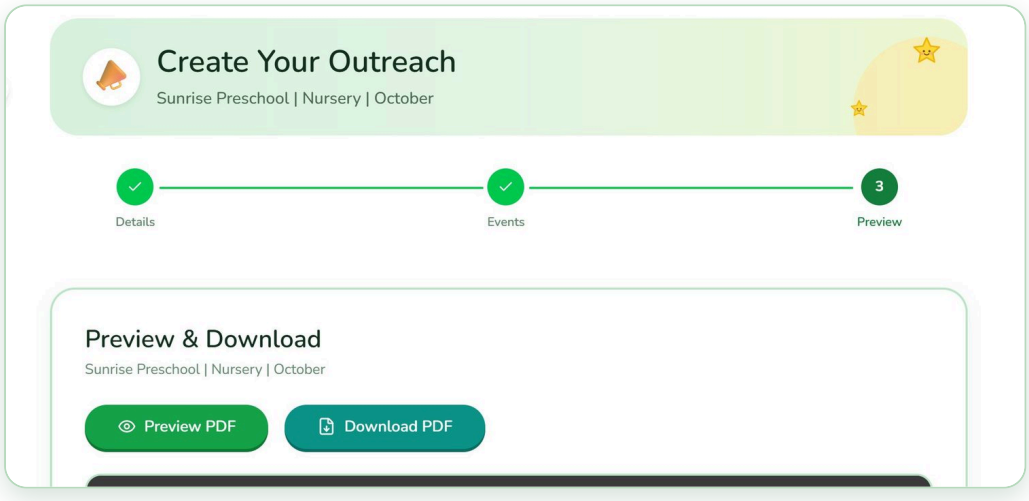

Outreach builder (three steps)

Steps: **Details** → **Events** → **Preview**. Step 1 is the same school-details form as above (name, month, class, logo).

Step 2: the events you will promote.

1. Type the **Society / Event Address**, for example the housing society where you will hold an event.
2. Under **Suggested**, press a ready-made event (such as *World Food Day*) to add it. Or type your own in **Event Name** and press **+ Add**.
3. Added events appear as green chips. Press the **×** on a chip to remove it.
4. Press **Continue**, then **Preview PDF** or **Download PDF**.

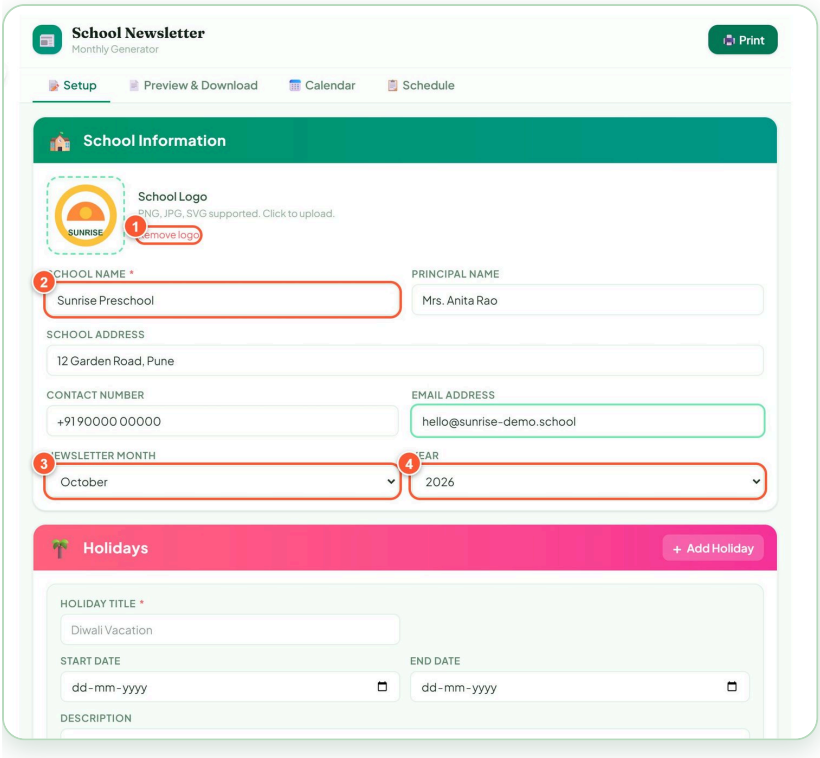

Step 3: the finished PDF.

2.9 School Newsletter App

Turn a few facts — holidays, events, birthdays, activities — into a beautiful one-page monthly newsletter, a colour calendar and a day-by-day schedule.

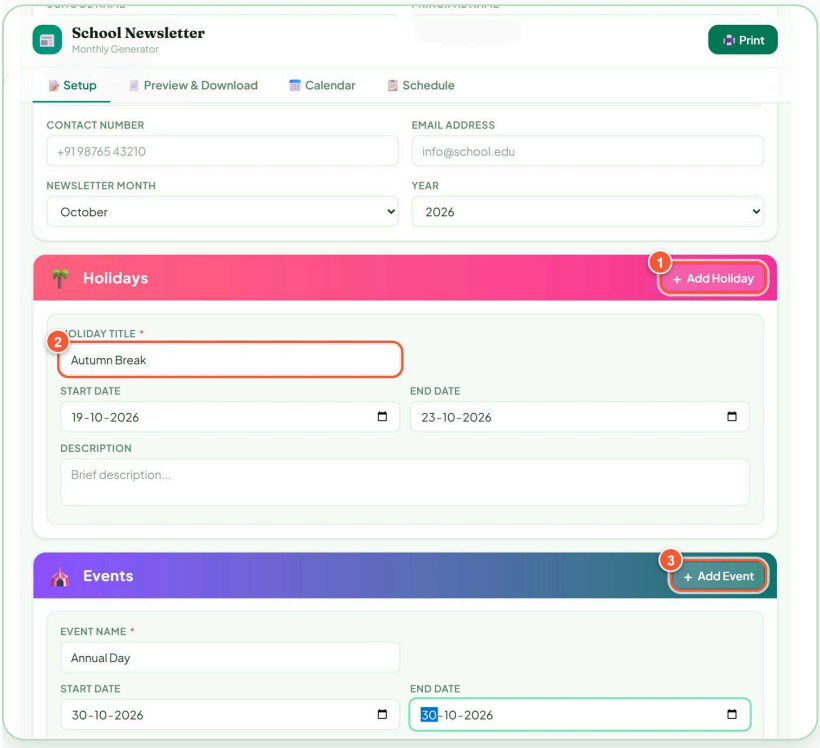

Good to know. The Newsletter is a **premium** area: it works while your subscription is active and is greyed out in the menu once it ends.

Four tabs run across the top: **Setup** (where you type), **Preview & Download**, **Calendar** and **Schedule**.

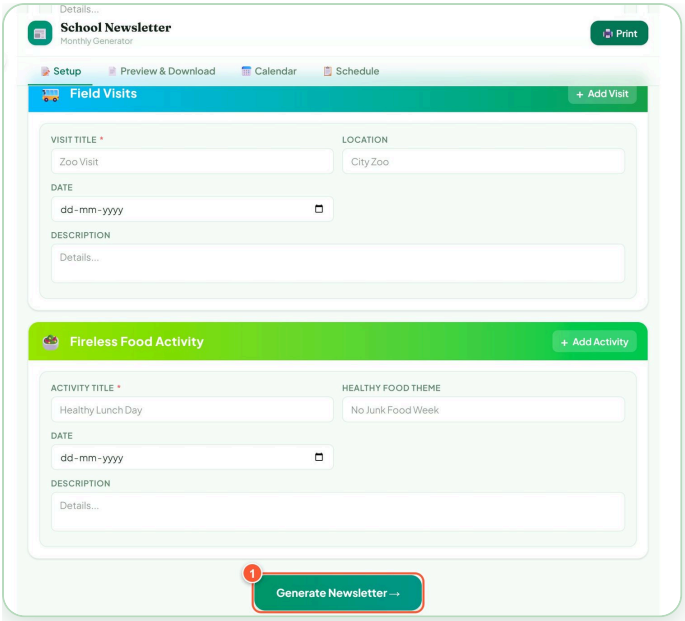

Setup: School Information.

1. Press **Upload Logo** and choose your logo (PNG, JPG or SVG). *Remove logo* takes it off again.
2. Type the **School Name** (required). Then, if you like, the principal's name, address, phone number and email.
3. Choose the **Newsletter Month**.
4. Choose the **Year**.

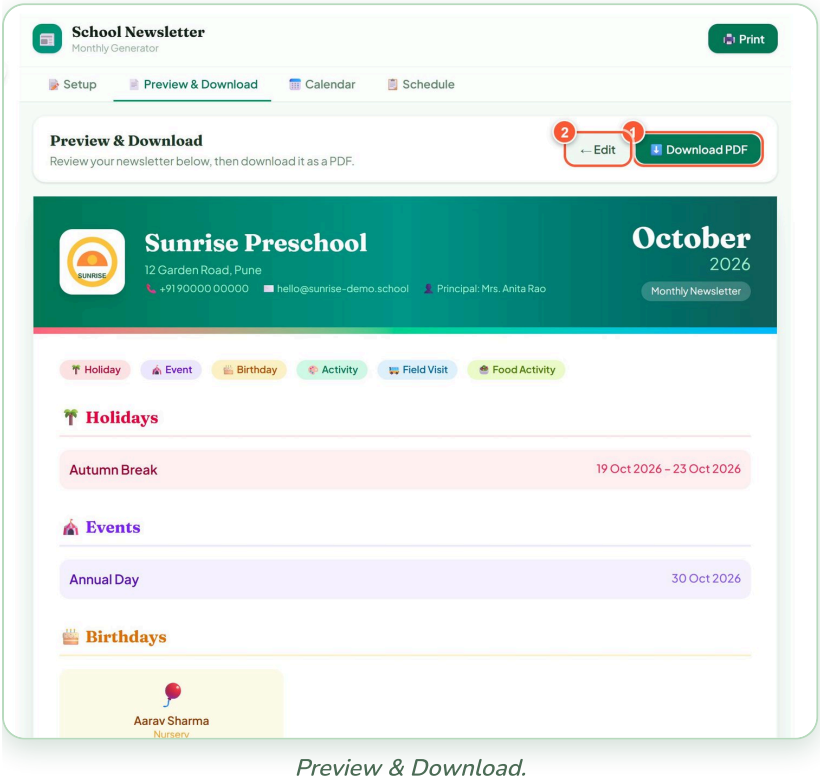

Below School Information come coloured sections for everything happening in the month.

1. Each section — **Holidays, Events, Birthdays, Activities, Field Visits** and **Fireless Food Activity** — has a button such as **+ Add Holiday** to add another entry.
2. Fill in a title and the dates (and a short description if you like). A title is required for every entry; the small ✕ removes an entry.
3. **+ Add Event** and the other add-buttons work the same way.

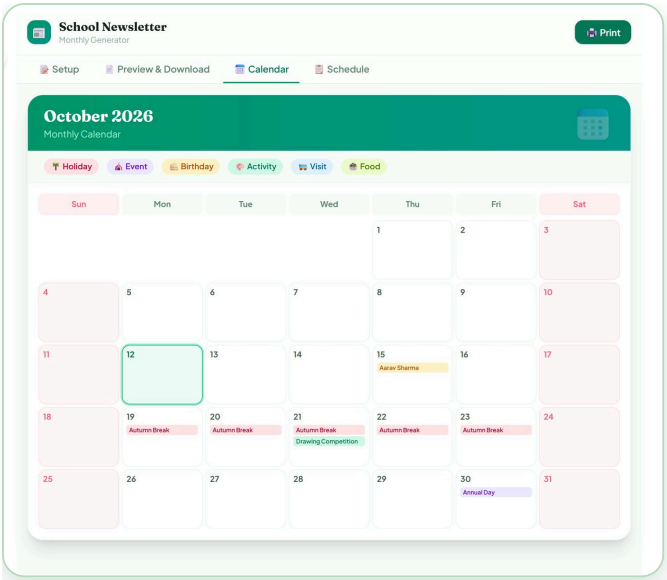

At the very bottom of Setup.

1. Scroll to the bottom and press **Generate Newsletter →**.

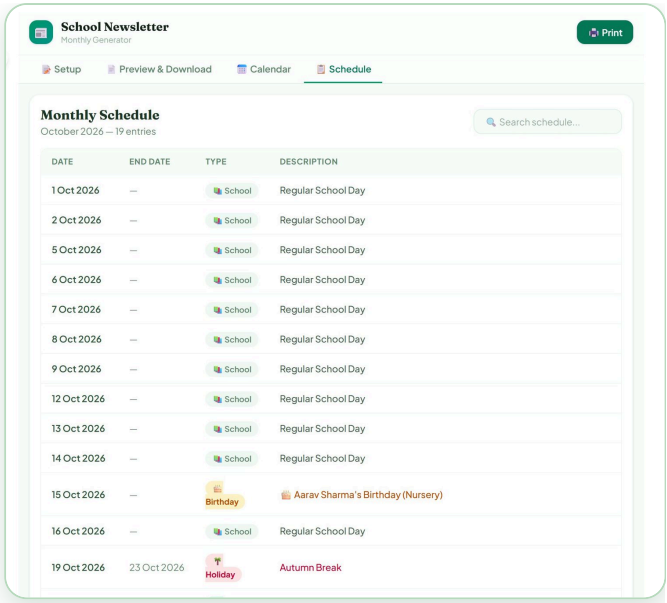

Preview & Download.

1. Press **Download PDF**. The print window opens: choose **Save as PDF**.
2. Press **← Edit** to go back and change something.

Calendar: every entry on its day, colour-coded.

Schedule: a searchable list of the month.

- **Calendar** shows the month as a wall calendar. Holidays, events, birthdays, activities, visits and food activities each have their own colour; weekends are shaded pink and today is outlined.
- **Schedule** lists every day of the month with its type and description. Use the search box to find an entry quickly.
- The **Print** button at the top right prints whichever tab you are on.

> **Tip. Using the newsletter inside an Admission Doc?** Open the Newsletter App from step 4 of the Admission Doc builder. On the preview tab you will see an extra green button, *"Done — Return to Admission Doc"*. Press it, close the tab, and your newsletter is added to the document.

PART 3

Admin guide

Create and look after your customers' accounts: add a new Parent or School, renew a subscription, reset a password, or remove an account.

For: Admin accounts

3.1 What an Admin can and cannot do

You can

- Sign in to your Admin Dashboard
- Add new customers (Parent or School accounts)
- See the list of customers **you** created
- Edit them — renew, change password or price
- Delete them

You cannot

- See customers created by another Admin
- Create, edit or delete other Admins
- Hand a customer over to someone else
- Open the nine learning areas (those are for Parent and School accounts)

Good to know. Your list only ever shows the customers **you** created. This is built into the system, so even if two Admins use the same computer they can never see or change each other's customers.

3.2 Signing in and finding your way around

Sign in on the usual Sign In page (section 1.1). You can leave the Parent / School tile as it is — the site recognises you as an Admin and opens your Admin Dashboard.

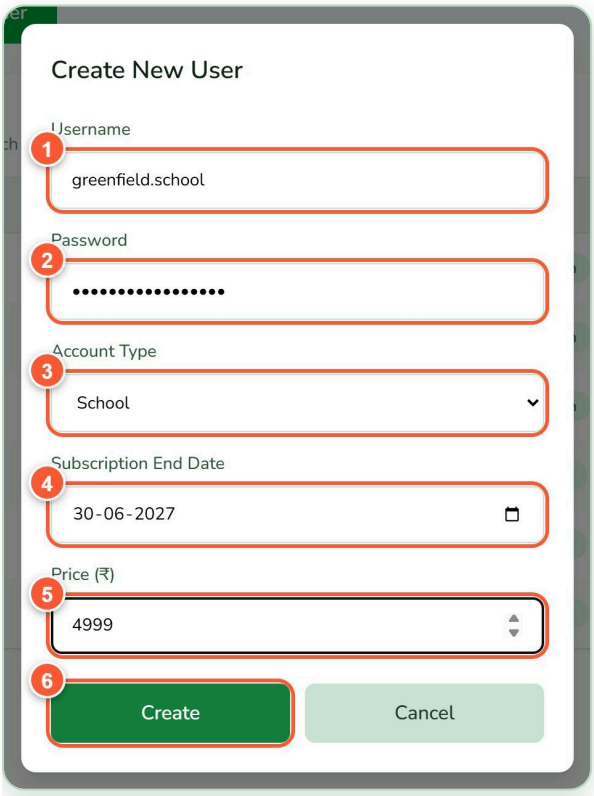

The Admin Dashboard. The heading shows who is signed in and which product you look after.

1. **My Users** shows your customers. This is the only tab an Admin has.
2. **+ Add New User** opens the form for a new customer (section 3.3).
3. **Edit** changes a customer's details (section 3.4).
4. **Delete** removes a customer (section 3.5).
5. **Logout** signs you out. Always use it when you finish.

The table shows each customer's **ID**, **Username**, subscription **End Date** and **Price**.

3.3 Adding a new customer

Do this whenever someone subscribes and needs a login.

The Create New User form. Admins and Super Admins use the same form.

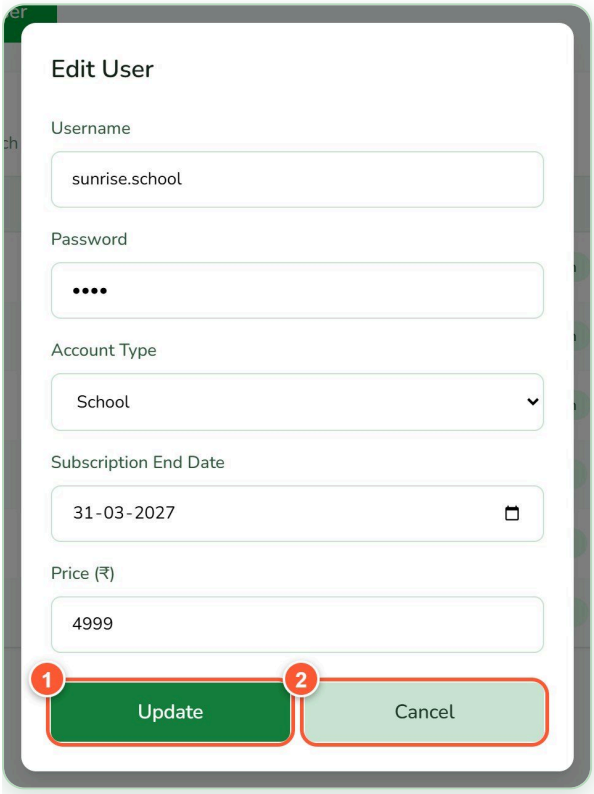

1. **Username** — the Login ID the customer will type. Make it easy to remember, for example the school's name.
2. **Password** — choose a password for them. They can be given a new one later if they forget it.
3. **Account Type** — choose **School** (a preschool) or **Parent** (a parent at home). This decides which sign-in tile they use and how their Home page greets them. Both types see the same nine learning areas.
4. **Subscription End Date** — pick the date their access ends (see the tip below).
5. **Price (₹)** — type the amount they paid. It is for your records and appears in your list.
6. Press **Create**. You will see *"User created successfully!"* and the new customer appears at the top of your list. Changed your mind? Press **Cancel**.

⚠️ **Please note. Every box is needed.** If one is empty you will see *"Please enter a username and password"* or *"Please fill all fields"*.

💡 **Tip.** The site treats the **end date as the first day without access**. If a customer should have access up to and including 31 March, choose **1 April**. Their "days left" counter on their Dashboard counts down to the end date.

💡 **Tip.** After creating an account, tell the customer their username, password and **which tile to choose (Parent or School)**. Share the password privately — by phone or a personal message, not in a group.

3.4 Renewing, changing a password or fixing details

The Edit User window shows the customer's current details.

1. Find the customer in your list and press **Edit** on their row.
2. Change what you need: the **Password** (for someone who forgot it), the **Subscription End Date** (to renew), the **Price**, or the **Account Type**.
3. Press **Update**. You will see *"User updated successfully!"*

⚠️ **Please note. After a renewal, ask the customer to sign out and sign in again.** Their Dashboard reads the end date when they sign in, so the new date shows up on their next sign-in.

3.5 Deleting a customer

1. Press **Delete** on the customer's row.
2. A question appears: *"Are you sure you want to delete 'name'?"* Press **OK** to continue or **Cancel** to stop.
3. You will see *"Deleted successfully!"* and the customer disappears from your list.

⚠️ **Please note.** Deleting is **permanent**, and the customer can no longer sign in. If someone's subscription has simply ended, **do not delete** them — keep the account and change the end date when they renew.

3.6 Good habits for Admins

- Create **one account per school or parent**, so each can sign in on their own.
- Set end dates carefully and **renew a week before they run out**.
- Pick the right **Account Type** when you create the account — it saves the customer a confusing message at sign-in.
- Never share **your own** Admin password. Always sign out on shared computers.

PART 4

Super Admin guide

The owner account: everything an Admin can do for every customer, plus creating and managing Admins.

For: the Super Admin account

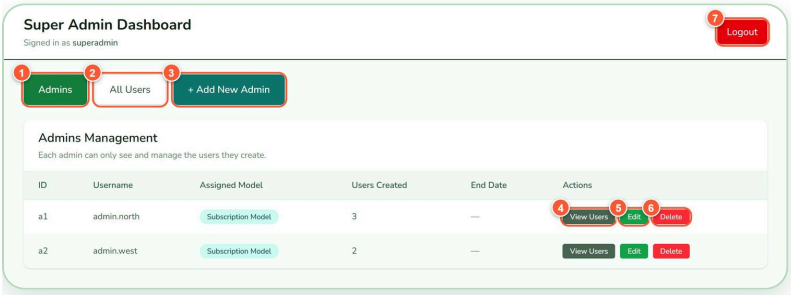

4.1 What a Super Admin can do

- See **every customer** in the system, and filter them by the Admin who created them.
- Add, edit and delete **customers** (the same steps as Part 3).
- Add, edit and delete **Admins**, and see how many customers each has created.

Good to know. There is one Super Admin account. Only a Super Admin can create an Admin — the system does not allow an Admin to create another Admin.

4.2 Your dashboard: the Admins tab

Sign in on the normal Sign In page (section 1.1). You arrive at the **Super Admin Dashboard**, which opens on the **Admins** tab.

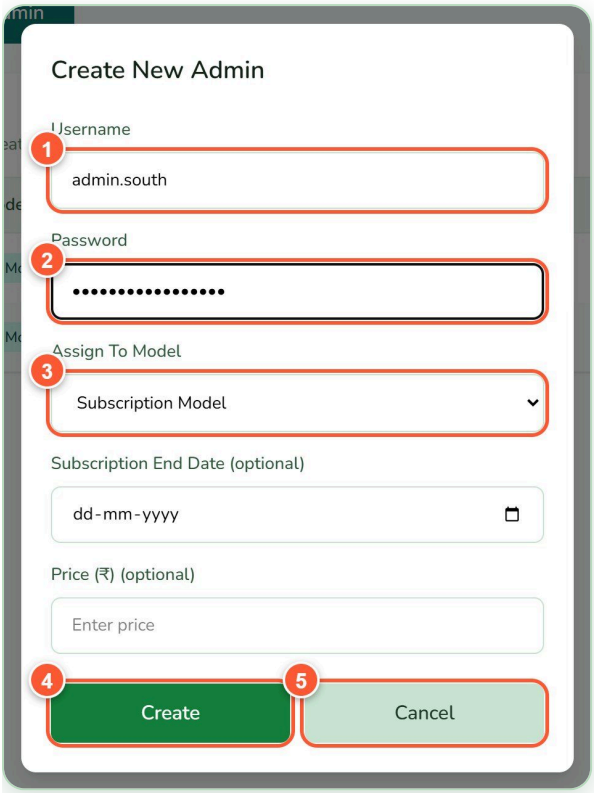

The Super Admin Dashboard, Admins tab.

1. **Admins** — the list of Admin accounts.
2. **All Users** — every customer in the system (section 4.4).
3. **+ Add New Admin** — creates an Admin (section 4.3).
4. **View Users** — jumps to the All Users tab, showing only that Admin's customers.
5. **Edit** — changes an Admin's details.
6. **Delete** — removes an Admin (section 4.5).
7. **Logout** — signs you out.

The table shows each Admin's **ID**, **Username**, **Assigned Model** (the product they look after), **Users Created** (how many customers they have added) and **End Date**.

4.3 Adding an Admin

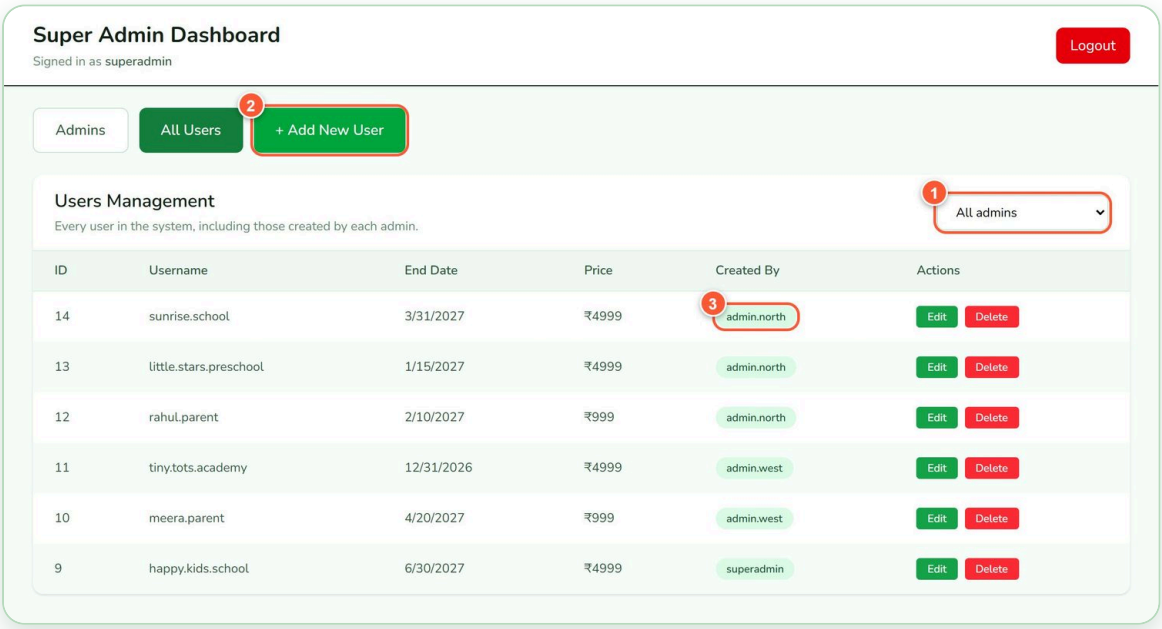

The Create New Admin window.

1. **Username** — the Admin's Login ID.
2. **Password** — their starting password.
3. **Assign To Model** — the product the Admin looks after. Today there is one choice, *Subscription Model*.
4. Press **Create**. You will see *"Admin created successfully!"*
5. Press **Cancel** to close the window without saving.

An Admin account also has two **optional** boxes — *Subscription End Date* and *Price* — which you can leave empty. A brand-new Admin starts with an **empty customer list** and can only ever see customers they add themselves.

> **Tip.** Give each team, region or partner their own Admin account. That way every team sees only its own customers, and you can see exactly how many customers each one has brought in.

4.4 Seeing and filtering all customers

The All Users tab, with the Admin filter at the top right.

1. Open the list **All admins** to filter. Choose one Admin to see only their customers, **All admins** to see everyone, or **Super Admin (legacy)** to see customers who no longer have an owner.
2. **+ Add New User** adds a customer yourself (same form as section 3.3).
3. The **Created By** column shows which Admin created each customer, as a small blue tag.

Each row also has **Edit** and **Delete**. Unlike an Admin, you can use them on **any** customer. Creating, renewing, editing and deleting customers works exactly as described in Part 3 (sections 3.3 to 3.5) — the only difference is that you can do it for **everyone**, not just customers you created.

> **Good to know. Super Admin (legacy)** collects customers who have no owner — most often customers whose Admin has been deleted (see 4.5). Customers you add yourself carry your own name, *superadmin*, in the **Created By** column and appear whenever you choose **All admins**.

4.5 Editing or deleting an Admin

1. On the **Admins** tab, press **Edit** to change an Admin's password, assigned model or optional dates, then press **Update** (*"Admin updated successfully!"*).
2. Press **Delete** to remove an Admin. A question asks you to confirm.

> **Deleting an Admin does not delete their customers.** The confirmation reads: *"The users they created stay in the system and become visible to the Super Admin only."* They move to **Super Admin (legacy)**, and you can keep serving them.

PART 5

Help & quick answers

Quick answers to common questions, a “where do I click?” finder, and how to reach us.

For: everyone

5.1 Quick answers

Question	Answer
I forgot my password.	There is no automatic reset. Ask your Admin (or the team) to set a new one — they can do it in a minute (section 3.4).
It says “Subscription expired” but I have already paid.	Your end date must be updated by the team. Once they confirm, **sign out and sign in again**.
The site says I picked the wrong tile.	No problem. Tap the other tile (Parent or School) and sign in again.
I pressed “View & Download” and nothing happened.	Your browser may have blocked the pop-up. Allow pop-ups for this site and try again. The item may also say Coming Soon.
There is no sound in the games or Sound Books.	Turn the volume up, make sure the browser tab is not muted, and use Google Chrome. Tap a button once, then try again.
My Session Plan has disappeared.	Plans are saved in the same browser, under the same login. A different computer or browser, or cleared browsing data, starts empty. Use **Print → Save as PDF** to keep a safe copy.
My online assessment answers are gone.	Online answers are not stored. Press **Print as PDF** before you leave the page.
The colours are missing when I print.	In the print window, open **More settings** and switch on **Background graphics**.
A coupon says “Coupon Expired”.	Ask the team for the latest coupon code (section 2.5).
The Newsletter menu item is greyed out.	That area is premium. It unlocks again when your subscription is renewed (section 1.6).

Question	Answer
Can I use ECCE Tool on my phone?	Yes. See section 1.5. A tablet or computer is more comfortable for forms and printing.
Which browser is best?	Google Chrome works best, especially for sounds and printing.

5.2 "I want to..." finder

I want to...	Go to...	Guide
Plan a whole school term and print it	School Management → Build Your Session Plan	2.6
Get this week's lesson plan	Curriculum → LEMCore (or ACT) → class → month → Weekly Syllabus	2.1
Print practice sheets for a festival	Worksheets → Month-wise Worksheets	2.2
Find summer holiday homework	Worksheets → Summer Worksheets	2.2
Get colouring pages	Worksheets → Theme based colouring	2.2
Play learning games with children	Online Tools	2.3
Check a child's progress this month	Assessments → Month Formative → Do It Online	2.4
Find out a child's daily calorie need	Assessments → Nutritional Assessment	2.4
Give parents a skills checklist	Curriculum → Parent Counselling Tools	2.1
Test a child for admission	School Management → Admission Test	2.6
Let children learn letters and numbers by sound	School Management → Sound Book	2.6
Make an admission brochure	Marketing → Build Your Professional Admission Doc	2.8
Plan visits and events to promote the school	Marketing → Create Your Outreach	2.8
Make a monthly newsletter	Newsletter	2.9
Train my teachers	Teacher Support & Training	2.5
Check toys and materials in classrooms	Audit Tools	2.7
Add a new customer (Admins)	Admin Dashboard → + Add New User	3.3
Renew a subscription (Admins)	Admin Dashboard → Edit → End Date	3.4
Add a new Admin (Super Admin)	Super Admin Dashboard → Admins → + Add New Admin	4.3

5.3 Ten things to remember

1. **Pick the tile that matches your account** (Parent or School) when you sign in. If you pick the wrong one, the site tells you which to use.
2. Your **username and password come from the team or your Admin**. Keep them private.
3. **View & Download** and **Open Worksheet** open the file in a **new tab**. Allow pop-ups if nothing appears.
4. To save a page as a file, press **Print** and choose **Save as PDF**.
5. A **Session Plan** is saved in your browser; **online assessment answers are not** — print them before you leave.
6. Add **every school holiday** to your Session Plan as a vacation.
7. Your **days-left counter** is in the menu. Renew early, then **sign out and in** to see the new date.
8. **Always sign out** on a shared computer.
9. **Google Chrome** works best, especially for sounds and printing.
10. Coming Soon means the item is being prepared — it will switch on by itself.
